

**CTO**LIGHTING

**THE ART OF LIGHT**

CTO Lighting is a British design house creating understated luxury lighting of uncompromising quality. For over 25 years, the brand has illuminated the world's most sophisticated interiors with lights defined by timeless elegance, noble materials, and exceptional craftsmanship.

Founded in 1998 by Chris and Clare Turner, CTO Lighting was born from a shared vision to elevate British lighting through precision engineering and refined design.

Every CTO piece is meticulously hand-assembled in the UK using the finest materials from across Europe, including hand-finished brass, mouth-blown glass, and

artisan-crafted stone. Inspired by nature's raw beauty, each design celebrates materiality, tactility, and light itself. The result is a collection of lights that bring a soft, ambient glow to any space.

But CTO lights offer more than illumination. They shape mood. They create atmosphere. Designed to be felt as much as seen, each piece invites stillness, intimacy, and reflection, shaping the mood and character of the spaces they inhabit.

From grand chandeliers to sculptural floor lamps, CTO Lighting creates with longevity in mind. The designs are not made for trends, but for permanence.

# TRACE

A versatile and scalable pendant available in Bronze and Antique Bronze as standard.

The TRACE collection celebrates connection and scalability, allowing for an infinite number of sculptural configurations. Inspired by the natural world and the work of sculptor Andy Goldsworthy, each component is thoughtfully connected, creating an ethereal composition.

A harmonious blend of metal and glass, TRACE is an artistic installation that transforms any interior with its refined elegance and bespoke possibilities. This versatility allows interior designers to customise their luxury projects, choosing the ideal scale, finish, and configuration to complement their vision.

The TRACE CIRCULAR Chandelier captures the essence of sculptural connection in its most balanced form. Available in Large, Extra Large and Halo configuration, this statement piece is defined by its flowing, curved metal strands and unique veiled glass shades - crafted using liquid opal and pulegoso techniques to achieve a soft, diffused glow.

Designed to create a focal point in dining areas, reception rooms or open-plan interiors, the circular composition brings a sense of harmony and movement to contemporary spaces.

TRACE CIRCULAR LARGE | ANTIQUE BRONZE

TRACE CIRCULAR LARGE | ANTIQUE BRONZE

TRACE CIRCULAR HALO | ANTIQUE BRONZE

TRACE showcases our ethereal new material, veiled glass.

The shade is handcrafted using a process that unites the ancient Pulegoso technique with liquid opal. Molten glass, heated to over 800°C, is rhythmically poured into steel moulds and shaped by hand before being slowly annealed for 24 hours to achieve its signature veiled, mist-like texture.

The result is glass that diffuses light with quiet softness. An atmospheric material at the heart of our sculptural new collection.

TRACE FREE FALL is the vertical expression of the sculptural TRACE collection - a contemporary chandelier designed to create visual impact in spaces with height and scale. Suspended in cascading formation, its elegant strands of hand-finished metal hold veiled glass shades that diffuse light with a soft, ethereal glow. Offered with 5, 7 or 9 strands, the Free Fall version allows designers to tailor the composition to suit stairwells, entrance halls, or double-height spaces.

TRACE LINEAR X | ANTIQUE BRONZE

TRACE LINEAR reimagines the chandelier as a sculptural composition of line, light, and materiality. Suspended horizontally, this refined fixture features curved metal strands and veiled glass shades that gently diffuse light to create a soft, atmospheric glow. Available in configurations of 2, 3, 5 or 7 strands, the design offers versatility for a range of interiors -from intimate dining areas to expansive kitchen islands or reception spaces.

#### EXPLORE CERES

Scan the QR code to explore every light in the CERES collection.

## CERES

Inspired by celestial discovery, the CERES collection unites hand-satined bronze and antique bronze finishes with sculptural forms and atmospheric light. Available in two distinctive designs – pendant and uplighter

The CERES collection draws inspiration from the Dawn Findings at Ceres, where NASA's discovery of light elements on the small solar planet evokes a celestial interpretation of the contemporary chandelier.

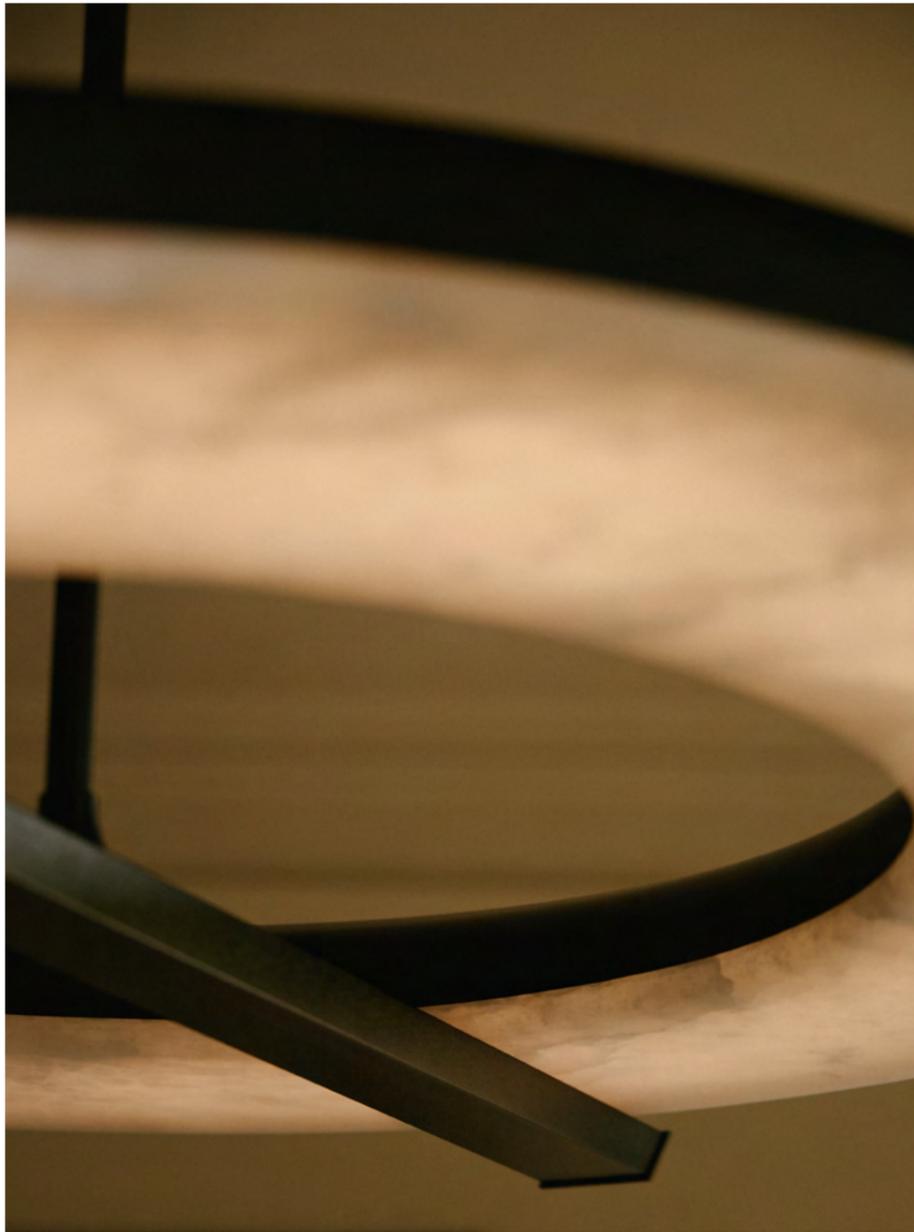

A fusion of precision engineering and artisanal craft, the CERES collection is both functional and sculptural, radiating an atmospheric elegance that evokes otherworldly beauty, transcending time and place.

CERES PENDANT | ANTIQUE BRONZE

CERES PENDANT | ANTIQUE BRONZE

At the heart of the CERES pendant is a luminous ring of honed alabaster, chosen for its natural translucency and softly diffused glow. This tactile, organic stone appears to radiate from within, evoking the glow of distant moons and planetary halos. Suspended beneath a contoured metal dome, the alabaster disc floats effortlessly, its celestial quality enhanced by the warm, reflective tones of hand-satinated bronze or antique bronze.

The CERES Uplighter is a sculptural ceiling light defined by its architectural form and upward-facing illumination. A contoured metal dome, finished in hand-satined bronze or antique bronze, casts a warm, ambient glow that softly reflects off the ceiling-enhancing atmosphere without overpowering the space. Sleek and minimalist, this uplighter brings refined elegance to contemporary interiors, offering a striking solution for spaces that call for subtle yet impactful lighting.

CERES PENDANT | ANTIQUE BRONZE

#### EXPLORE CONTOUR

Scan the QR code to explore every light in the CONTOUR collection.

## CONTOUR

The CONTOUR collection includes a wall light and a pendant, each combining textured kiln-cast glass with antique bronze to create sculptural forms inspired by nature. CONTOUR wall is also available in IP44 for bathrooms.

The CONTOUR collection is a study in texture, materiality, and light. Inspired by the organic lines of tree bark, this sculptural collection by Dan Yeffet for CTO Lighting layers irregular cast glass with patinated

metal, creating a dramatic interplay of shadow and illumination. The raw elegance of nature is reinterpreted in a refined, architectural form, bringing depth and movement to contemporary interiors.

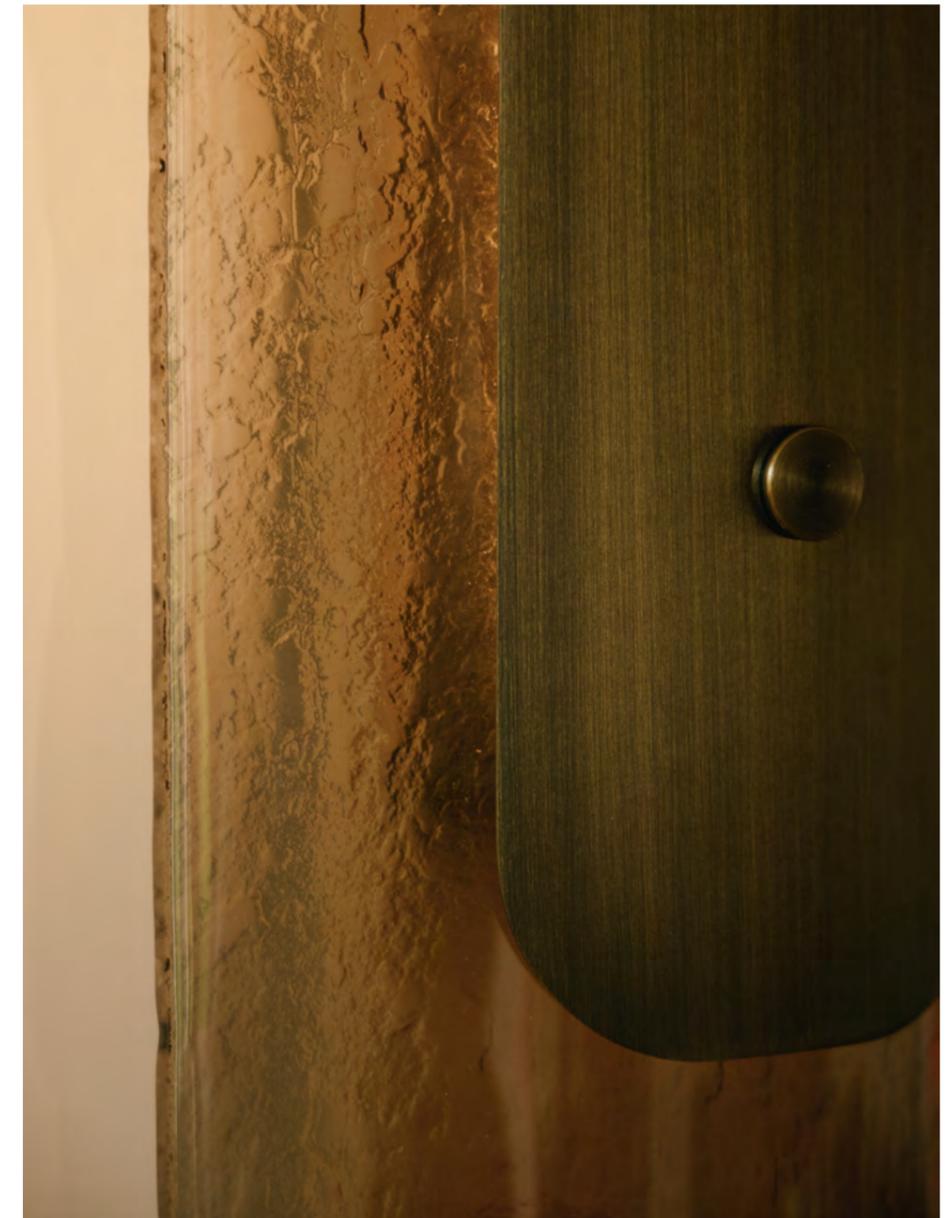

CONTOUR WALL | ANTIQUE BRONZE AND CLEAR KILN GLASS

CONTOUR PENDANT | BRONZE AND CLEAR KILN GLASS

The defining feature of the CONTOUR collection is its richly textured kiln glass, inspired by the organic patterns of tree bark. Each glass panel is individually cast to create an irregular surface that softly diffuses light, producing a gentle interplay of illumination and shadow. Available in clear or smoked glass, the material offers two distinct moods. Clear glass brings crisp brightness and clarity, while smoked glass adds depth and a subtle, ambient tone. Paired with the warmth of antique bronze, the combination creates a balance of natural elegance and architectural detail.

CONTOUR WALL I BRONZE AND SMOKED KILN GLASS

#### EXPLORE SHARD

Scan the QR code to explore every light in the SHARD collection.

## SHARD

The SHARD pendant is available in antique bronze or polished nickel and can be paired with either honed alabaster or bronze kiln glass, offering four distinctive combinations to suit a variety of interiors.

The SHARD collection explores the intersection of brutalist geometry and modernist refinement, resulting in a bold yet elegant sculptural form. Inspired by fragmented architectural elements reassembled into a blooming composition, SHARD casts an upward ambient glow that fills a space with soft,

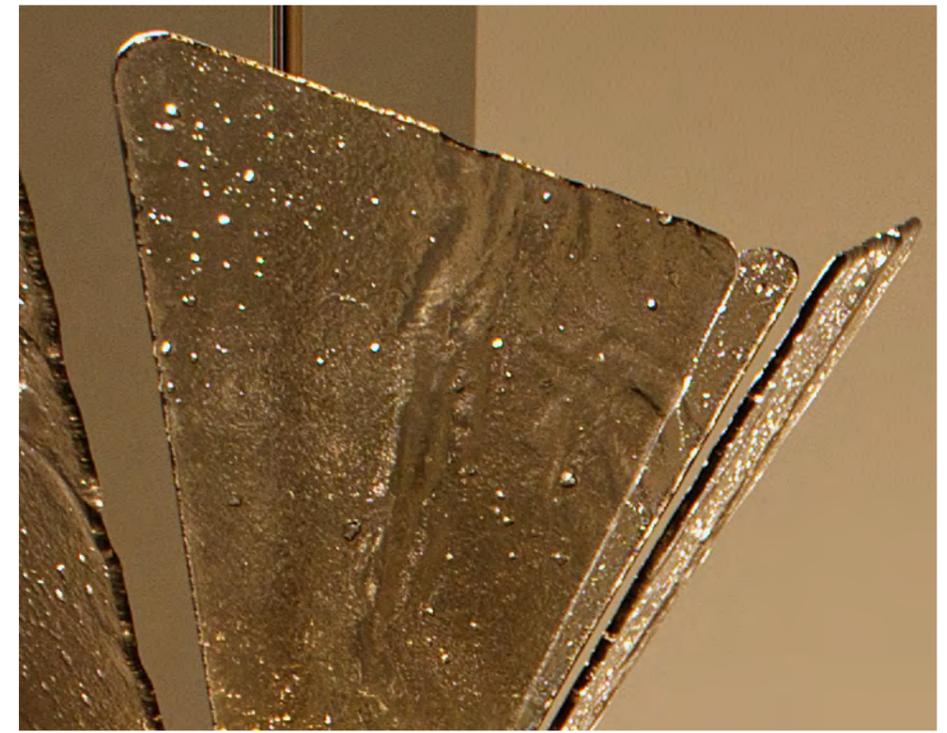

diffused light. Its angular, petal-like silhouette evokes both strength and delicacy, making it an ideal centerpiece for dining rooms, bedrooms, and entrance halls. This is a statement piece that embodies CTO Lighting's commitment to material integrity, artisanal craftsmanship and timeless design.

SHARD PENDANT | ANTIQUE BRONZE AND HONED ALABASTER

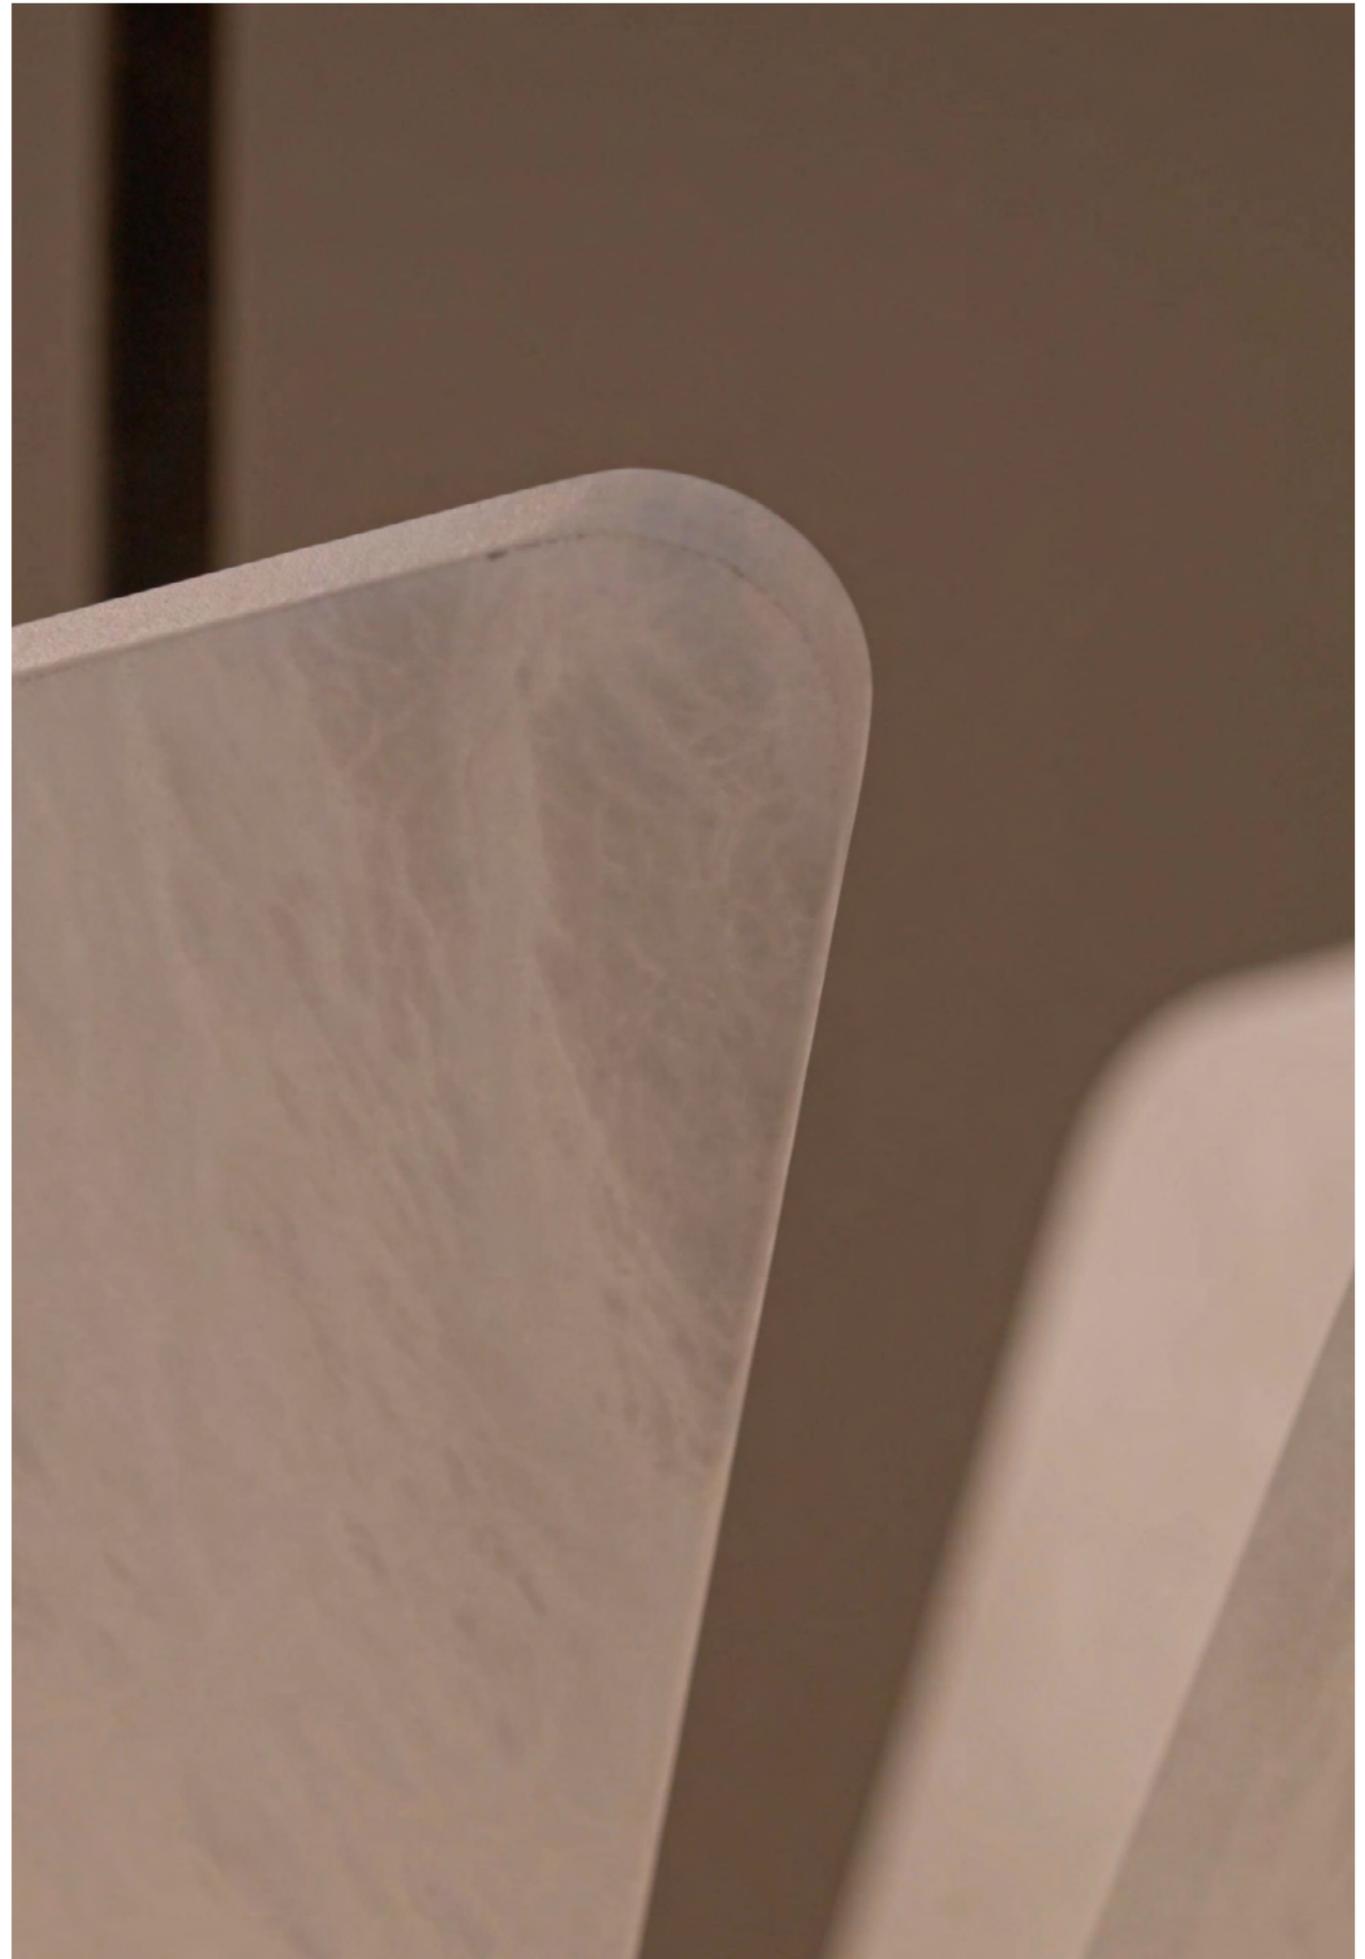

SHARD PENDANT | POLISHED NICKEL AND BRONZE KILN GLASS

The bronze kiln glass brings warmth and texture to the SHARD pendant, offering a rich, smoked tone that subtly filters light. Individually cast, the glass features natural surface variations that enhance its tactile quality and visual depth. The warm bronze tint complements the angular structure, creating a dramatic yet ambient glow that adds character and complexity to the design. This glass option lends a more moody and architectural presence, perfect for spaces seeking a balance of strength and softness.

Paired with the angular form of SHARD, honed alabaster introduces a gentle luminosity that softens its bold silhouette. The natural veining of the stone gives each piece a unique, organic character, diffusing light with a warm, ethereal quality. The pendant's pure brass base is finished in either antique bronze or polished nickel, offering two distinct expressions. Antique bronze adds depth and a sense of patina, while polished nickel brings a cooler, contemporary edge. Together, these materials form a sophisticated composition that celebrates contrast, craftsmanship and considered design.

#### EXPLORE RELIC

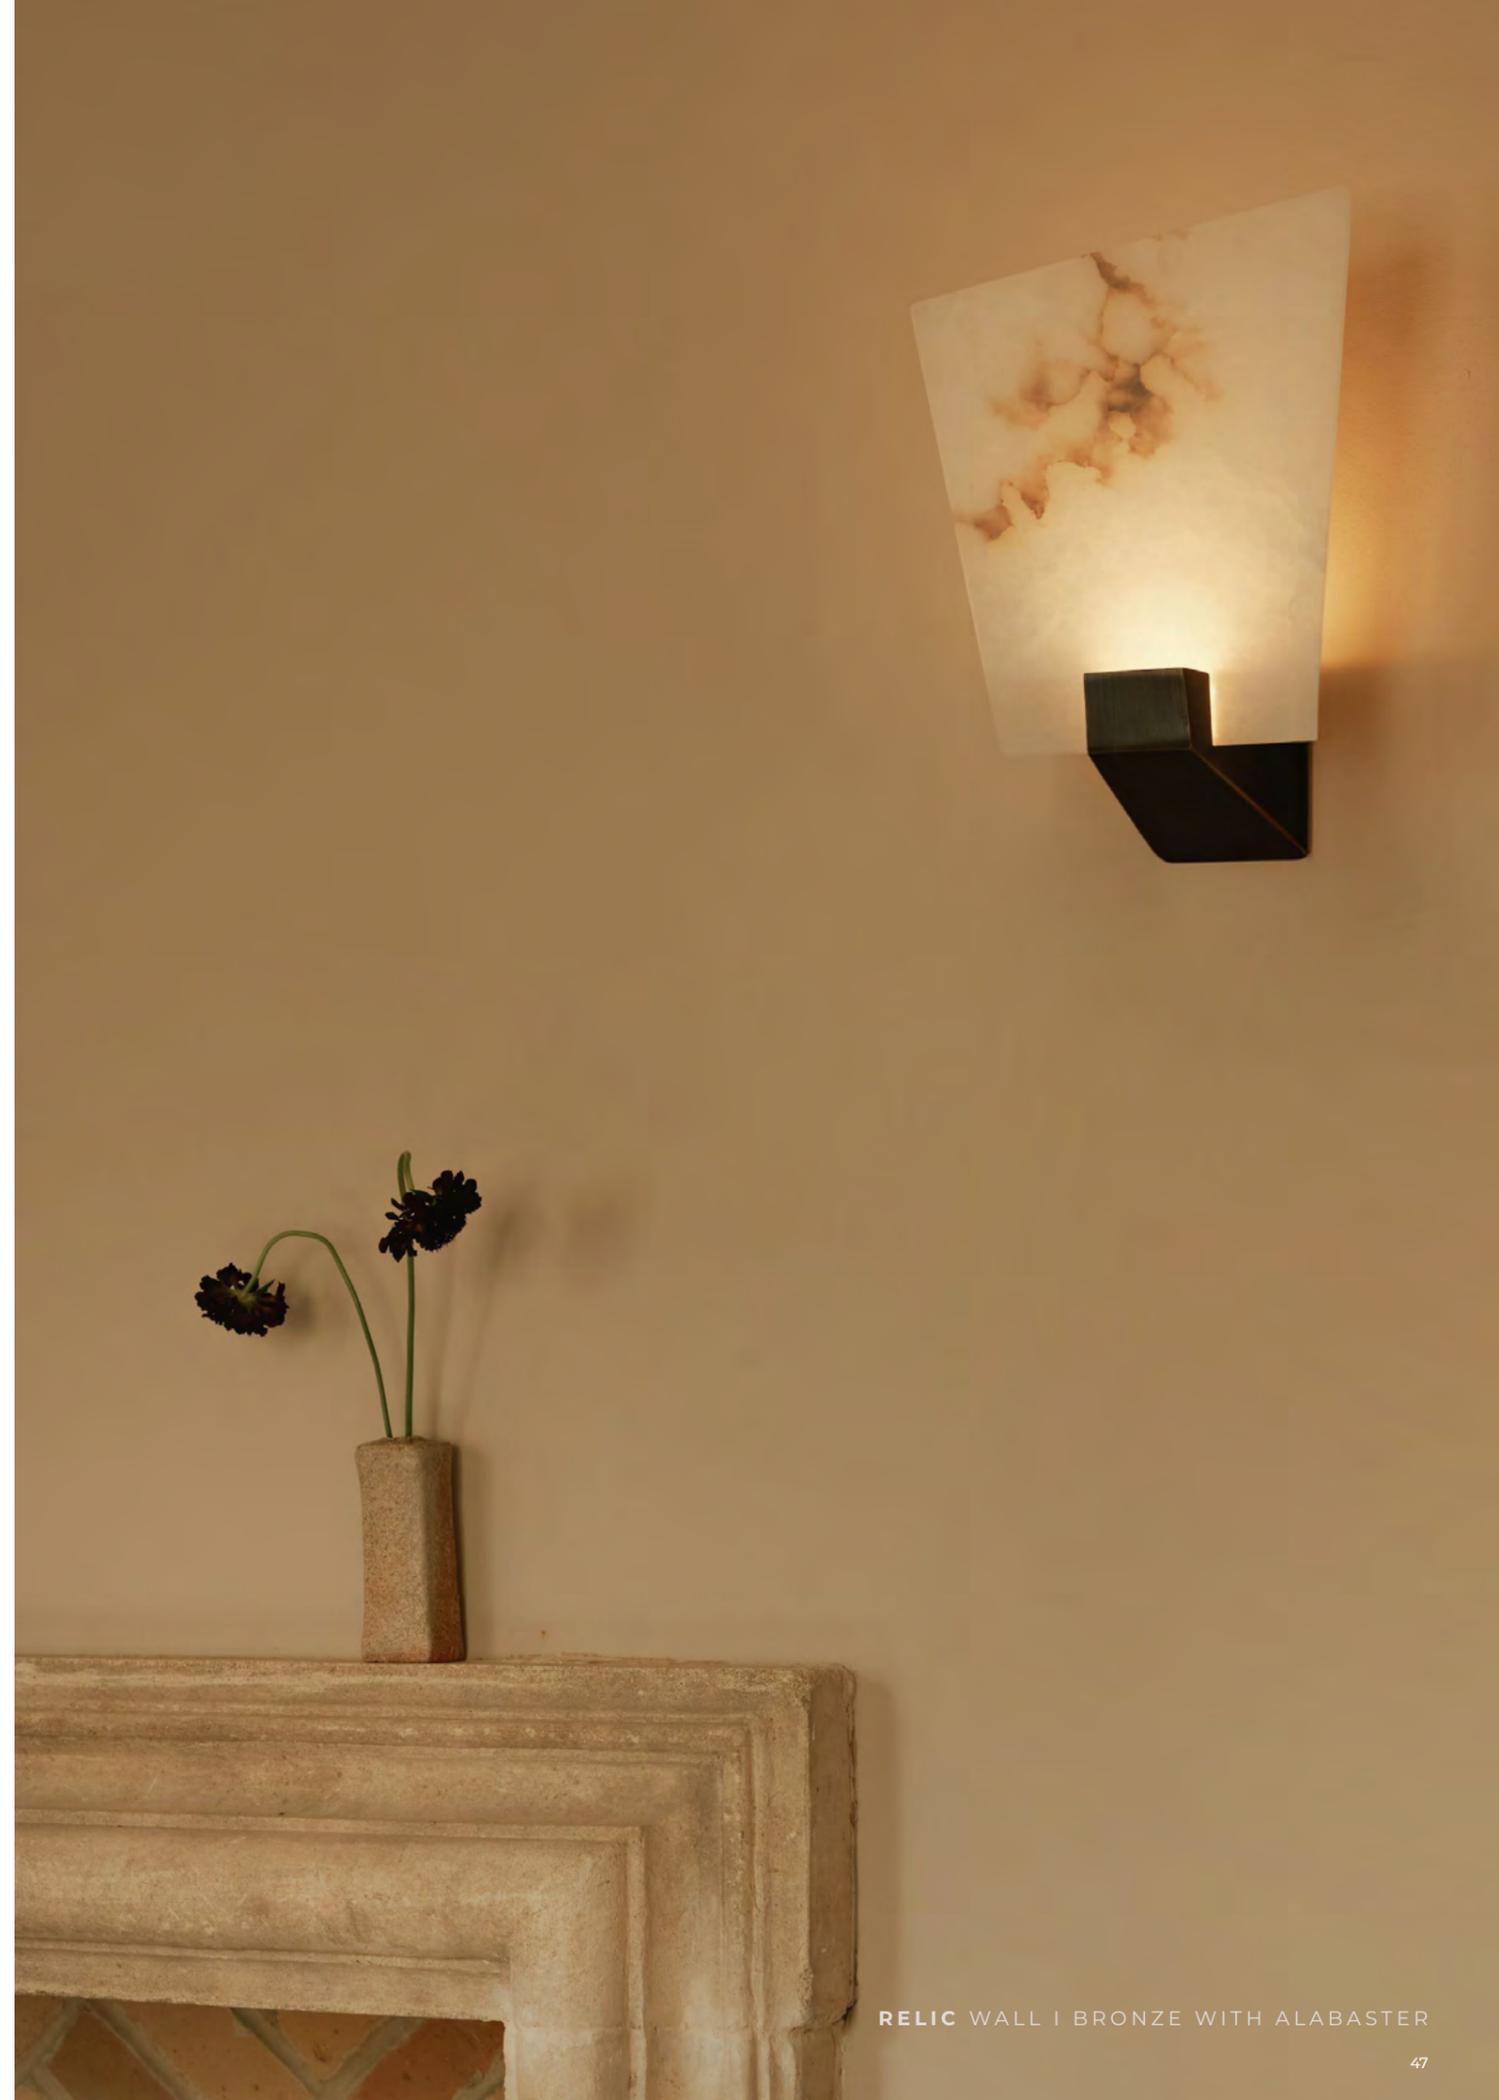

Scan the QR code to explore every light in the RELIC collection.

## RELIC

The RELIC wall light is available in antique bronze or polished nickel, paired with either honed alabaster or kiln-formed bronze glass.

The RELIC wall light is a sculptural interpretation of a discovered fragment, reimagined with modern refinement and quiet luxury. With clean lines and an asymmetric shade, RELIC combines geometric precision with material richness. Designed to enhance hallways,

reception rooms and transitional spaces, it casts a soft yet striking glow that transforms walls into moments of architectural interest. The design balances restraint and character, making it a subtle statement piece within contemporary and classic interiors alike.

RELIC WALL | BRONZE WITH ALABASTER

RELIC WALL I POLISHED NICKEL WITH BRONZE KILN GLASS

At the heart of RELIC is a contrast between sharp geometry and luminous materiality. The angled base, crafted from solid brass and finished in antique bronze or polished nickel, features chamfered edges that catch and reflect the light. This structured form supports a fragment-like shade in either honed alabaster or kiln-formed bronze glass. The alabaster emits a warm, diffuse glow with natural veining that enhances its organic beauty, while the kiln-formed glass introduces a richer tone and textured surface, adding depth and atmosphere. A discreet crystallised diffuser embedded in the base subtly enhances the light effect, creating a gentle radiance that speaks to CTO Lighting's signature blend of craftsmanship and innovation.

RELIC WALL I BRONZE WITH ALABASTER

#### EXPLORE JULES

Scan the QR code to explore every light in the JULES collection.

## JULES

The JULES pendant is available in six sizes, offered in a standard version or as the JULES Vault with a drop rod. Each combines cast bronze elements with an acid-etched blown glass shade.

Named after Belgian architect Jules Wabbes, the JULES pendant draws on his use of reductive forms and precise materiality. This sculptural light combines linear cast bronze elements with a soft, oval glass shade to create a pendant that feels both contemporary and timeless. Whether in its standard form or

the JULES Vault variation with drop rod, the pendant brings elegance and quiet strength to a variety of spaces—from dining and reception rooms to hallways and bedrooms. A celebration of form, proportion and craftsmanship, JULES is a true reflection of CTO Lighting's modern heritage approach.

The bronze pyramid sections are individually poured and cast in the UK using traditional techniques, then antiqued to enhance their linear texture and depth. These stacked forms create a striking vertical silhouette and can be configured to suit different pendant

heights. The acid-etched blown glass shade contrasts with the solid metalwork, diffusing the light to produce a soft, ambient glow. The result is a balanced interplay of weight and transparency, bringing warmth, detail and quiet drama to the interior.

#### EXPLORE CUBIST

Scan the QR code to explore the CUBIST table light.

## CUBIST

The CUBIST table light features a sculptural cast bronze base and a tailored linen shade

Inspired by the early 20th-century Cubist movement, the CUBIST table light explores geometric abstraction through form and material. Its silhouette breaks away from traditional symmetry, capturing the spirit of artistic experimentation with a confident, modern elegance.

The interplay between the angular base and the soft linen shade creates a striking visual balance, making CUBIST a distinctive addition to both classic and contemporary interiors. Designed to be appreciated from every angle.

The base of the CUBIST table light is crafted in solid bronze using traditional casting techniques, a process long favoured by artists for its ability to capture fine detail and depth. Hand-modelled by CTO's designers, the form features a rhythmic linear texture that highlights the artistry of the casting process. Once poured and cooled, the metal is meticulously finished to enhance its sculptural quality. The rounded pyramid shade, tailored in natural linen, softens the angular base while diffusing a warm, ambient light. This combination of tactile bronze and refined fabric brings together artistry and functionality in a piece that is both expressive and enduring.

#### EXPLORE ROC

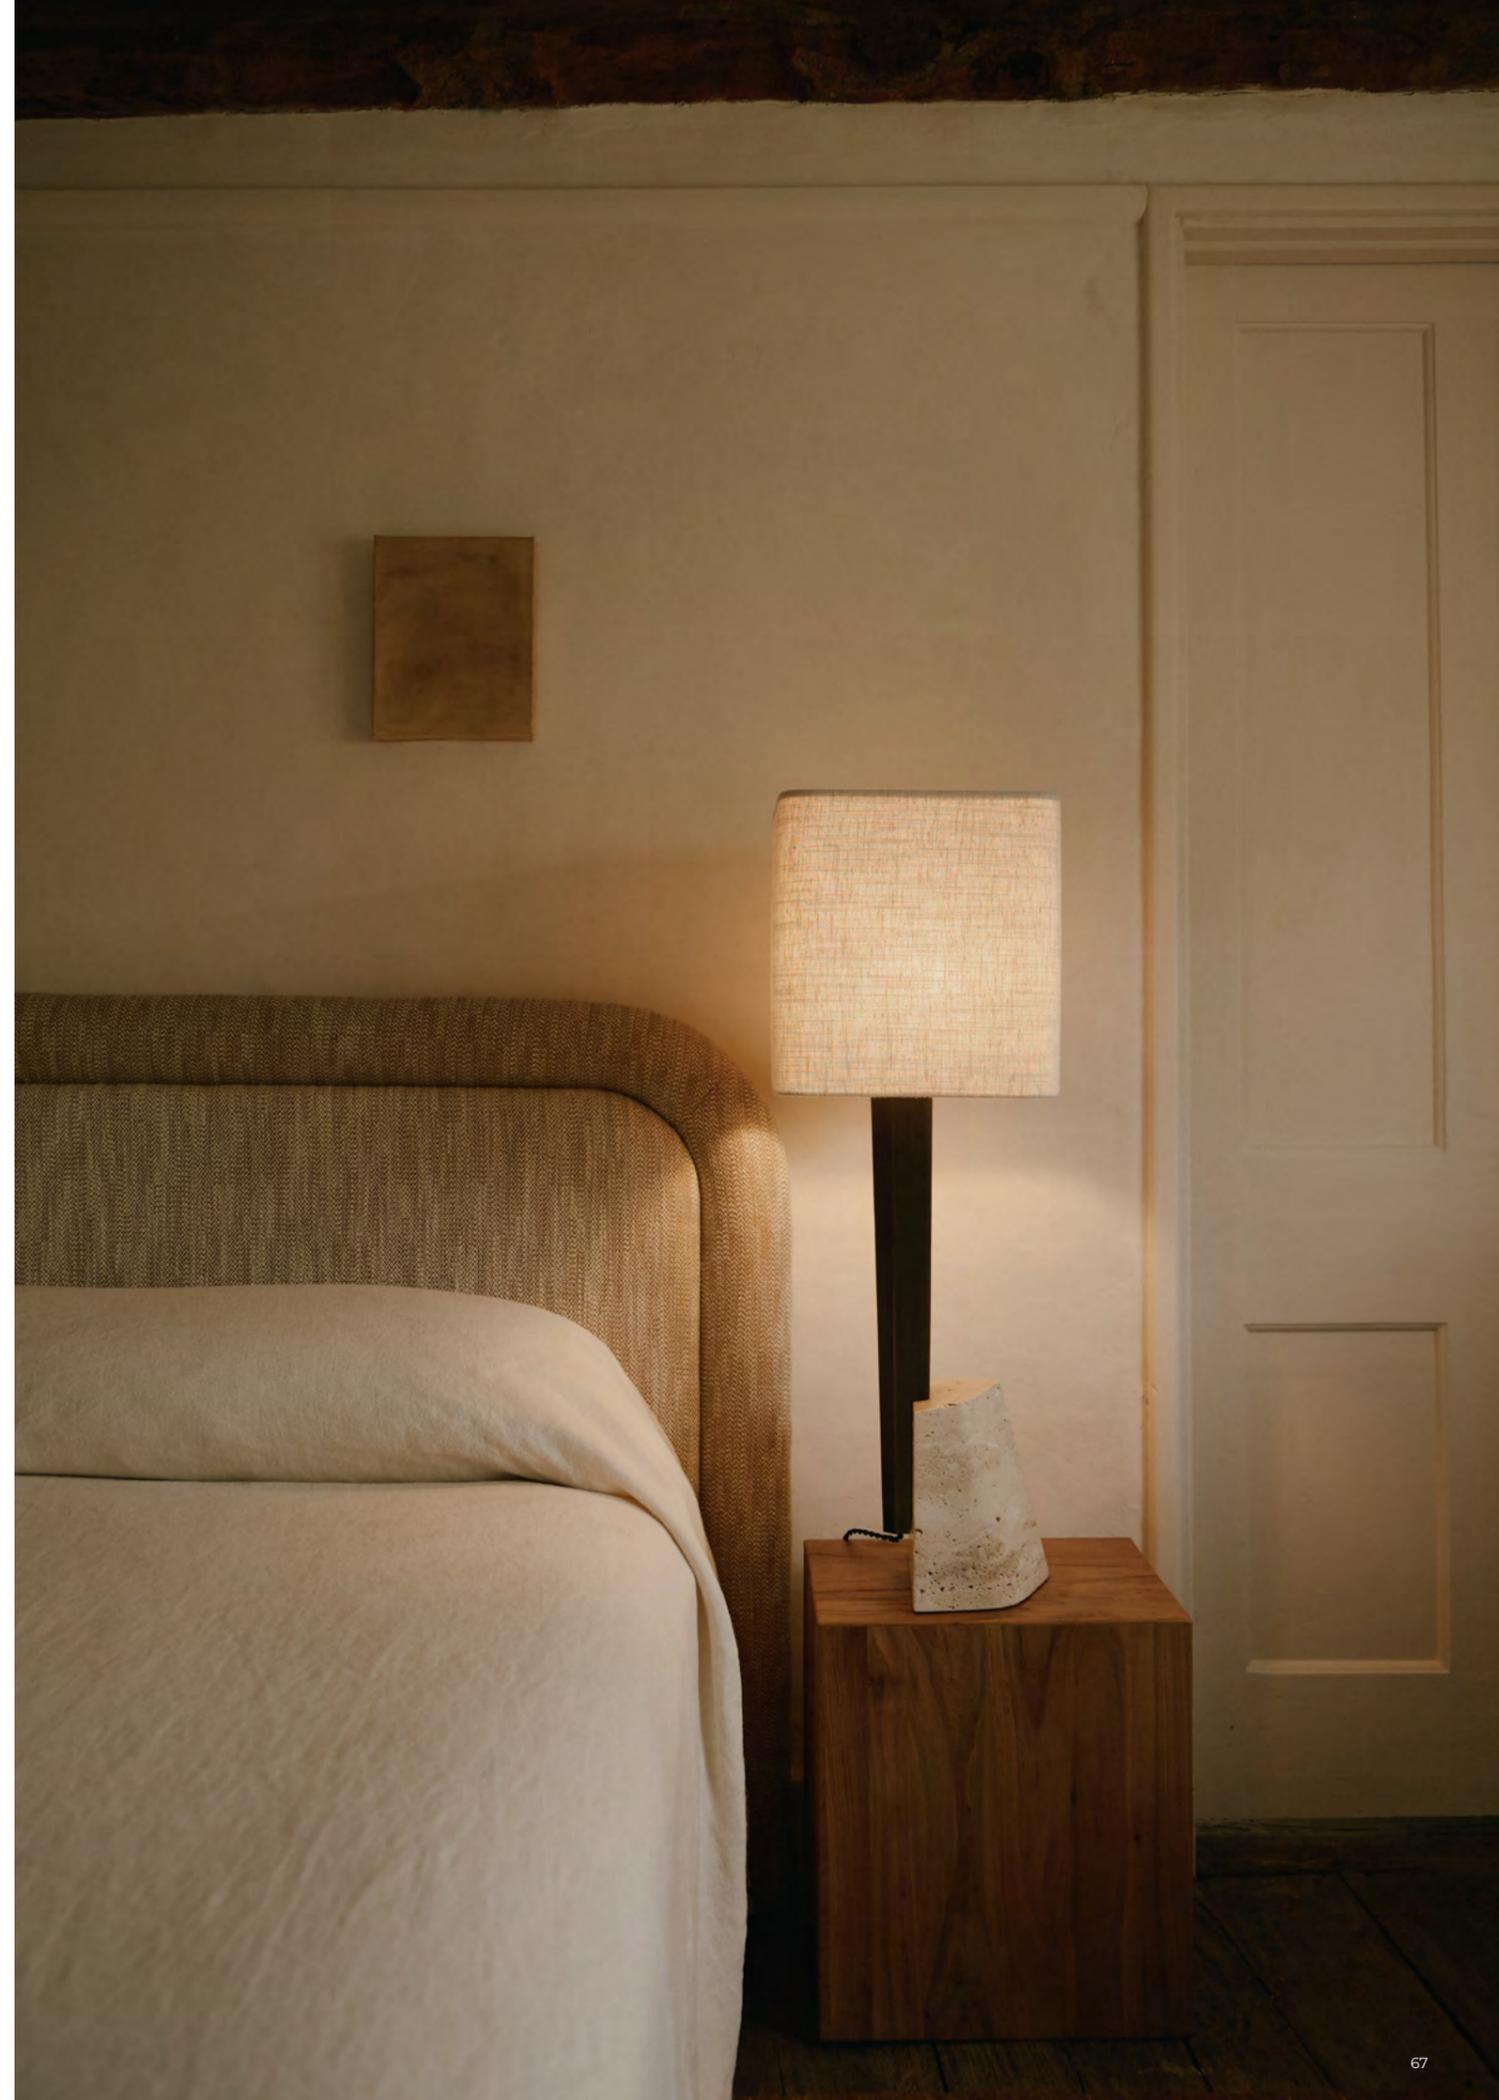

Scan the QR code to explore the ROC table light.

## ROC

The ROC table light pairs antique bronze with natural travertine and a linen shade, combining sculptural form with a rich material palette.

The ROC table light explores balance through contrasting forms and materials. By pairing the natural texture of travertine with the strength of faceted antique bronze, it offers a rich visual composition that feels both grounded and elevated. The design is softened by a rounded

square linen shade, which diffuses light to create a warm and ambient atmosphere. Ideal for reception rooms, bedrooms and hospitality spaces, ROC brings a sense of quiet luxury and architectural character to any interior.

Each piece of stone is naturally unique, with delicate veining and tonal variation that adds depth to the design. The antique bronze detailing is precisely faceted and gently antiqued to enrich its surface with subtle patina. A natural linen shade completes the composition, offering a soft contrast to the solidity of the stone and metal. Together, these three elements create a harmonious blend of material richness and contemporary elegance.

#### EXPLORE AVALON

Scan the QR code to explore every light in the AVALON collection.

## AVALON

The AVALON collection includes a range of sculptural pendants in multiple sizes and formats. Available in Medium, Large, and Extra Large, the collection also includes AVALON HALO, HALO XL, AVALON TRIPLE and AVALON OVAL. Each variation features honed alabaster cylinders and is offered with a choice of brass or bronze detailing.

Inspired by the mythical island of Avalon, this collection captures a sense of quiet magic through sculptural form and soft illumination. Cylinders of honed alabaster are arranged in circular or oval compositions, suspended from stainless steel cables that give the impression of floating light.

The warm, ambient glow diffused through the stone evokes an atmosphere of calm and elegance. Whether installed above a dining table, in a grand entrance or over a reception space, AVALON brings a refined presence to both residential and commercial interiors.

AVALON HALO | SATIN BRASS

AVALON CHANDELIER | MEDIUM | SATIN BRASS

Ornamental Minimalism at its best. AVALON is inspired by the legendary island, from where mystical stories of light and shadows have enchanted the world for centuries.

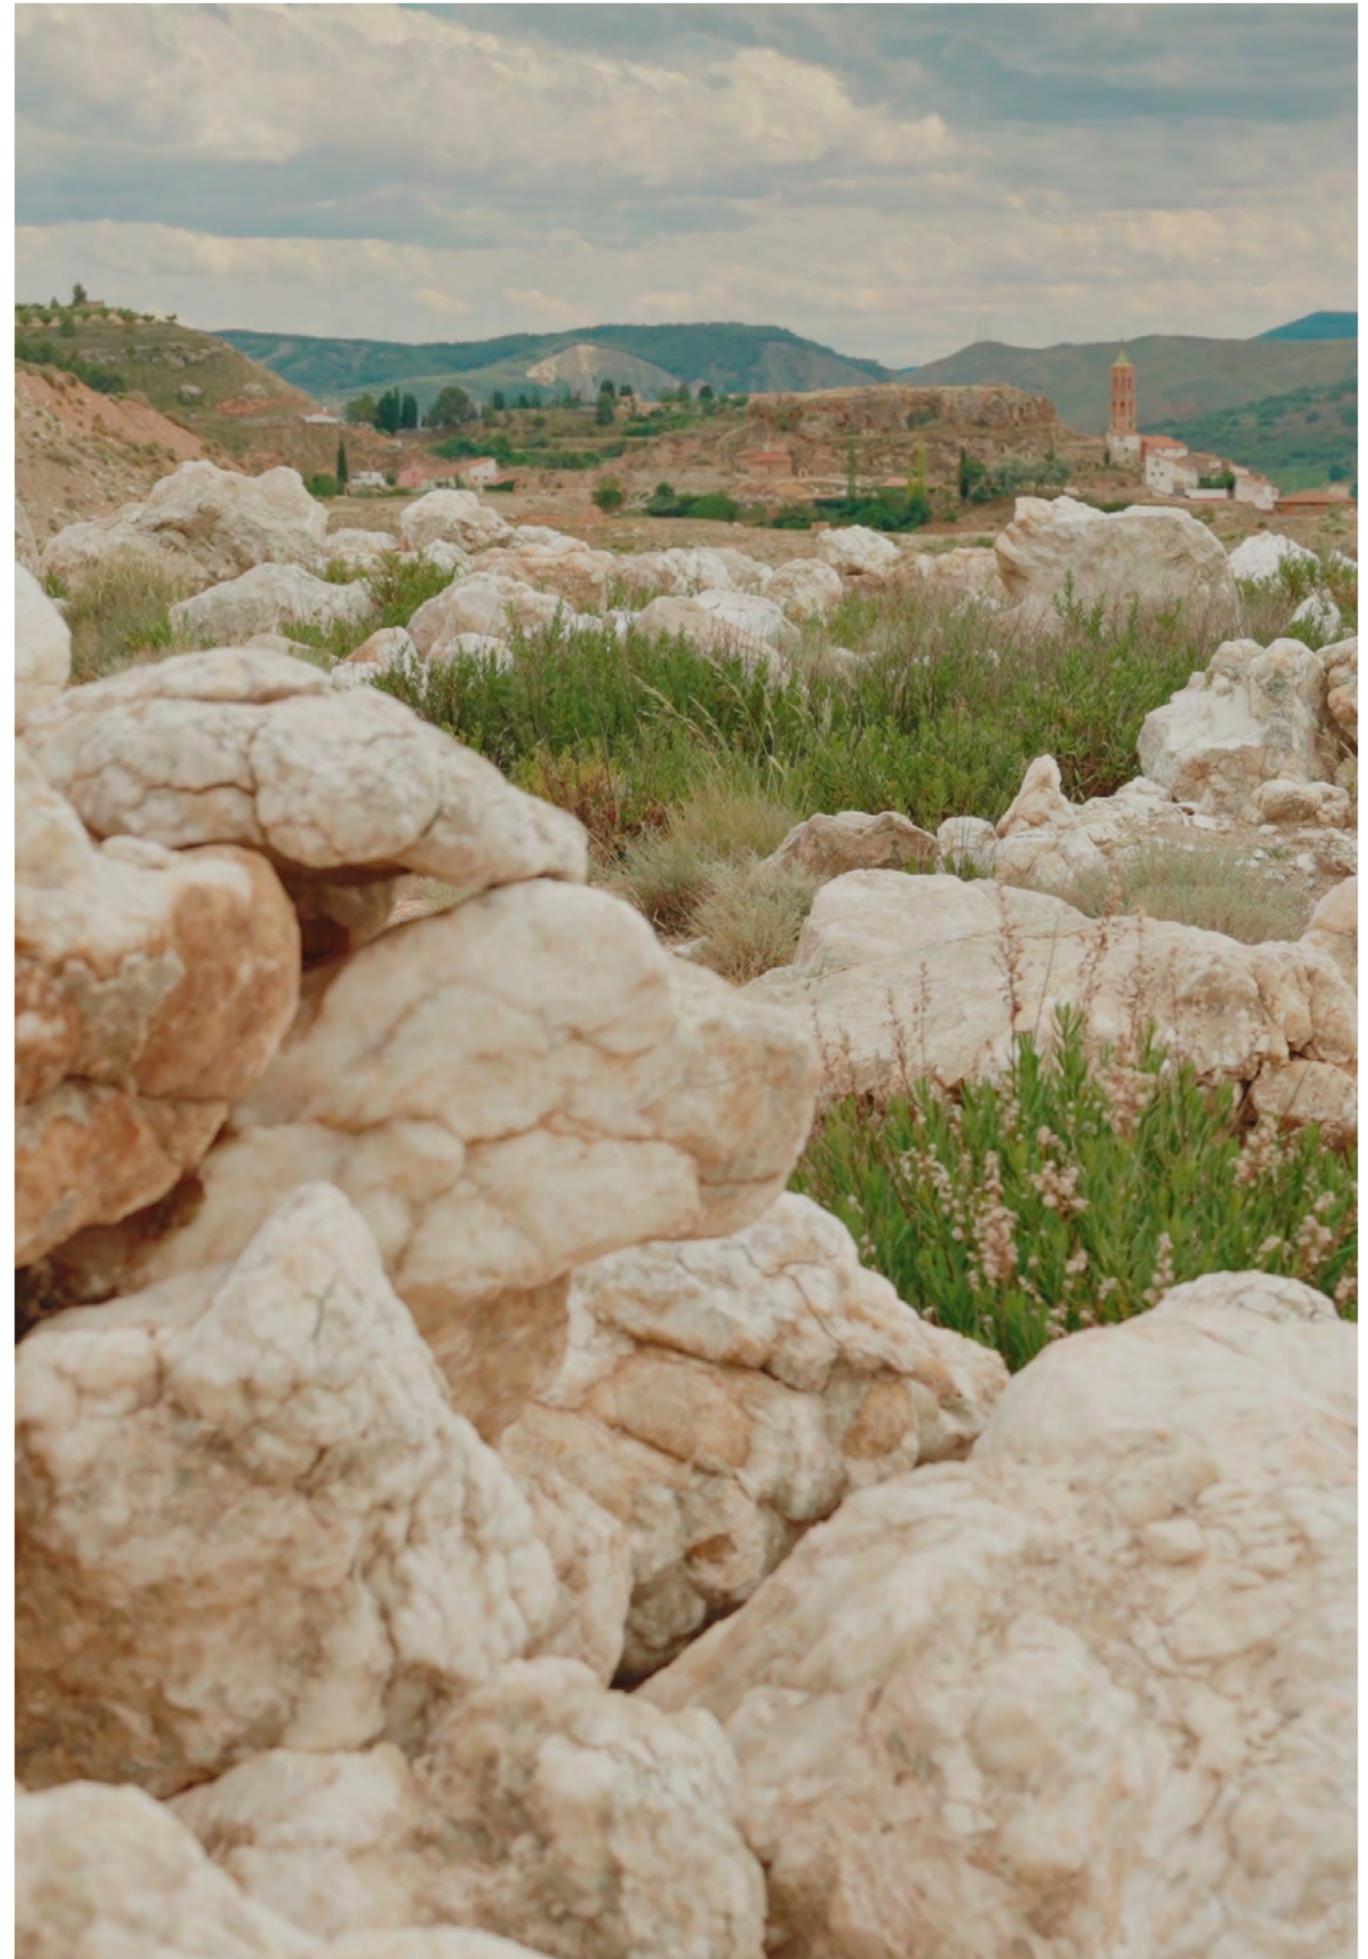

The collection blends classical proportions with decorative artisan materials and turns the concept of a chandelier on its head. The AVALON encases a precious ring of alabaster columns within the framework of the light resulting in a new unique chandelier. The ethereal light quality emanates from the brass or bronze fitting creating an exquisite sculptural piece.

AVALON CHANDELIER | BRONZE

It's in Zaragoza Spain, that our alabaster stone is mined from the depths of the earth. Celebrated for its unique veining and soft translucency, each piece is expertly crafted by our artisans using centuries-old techniques, ensuring durability without compromising its natural beauty. This noble material gently diffuses light, creating a warm, ambient glow that enhances the elegance of any room.

#### EXPLORE CASCATA

Scan the QR code to explore every light in the CASCATA collection.

## CASCATA

The CASCATA collection is available in two distinct formats: the original CASCATA chandelier with a triangular frame and the CASCATA Long chandelier with a linear rectangular frame.

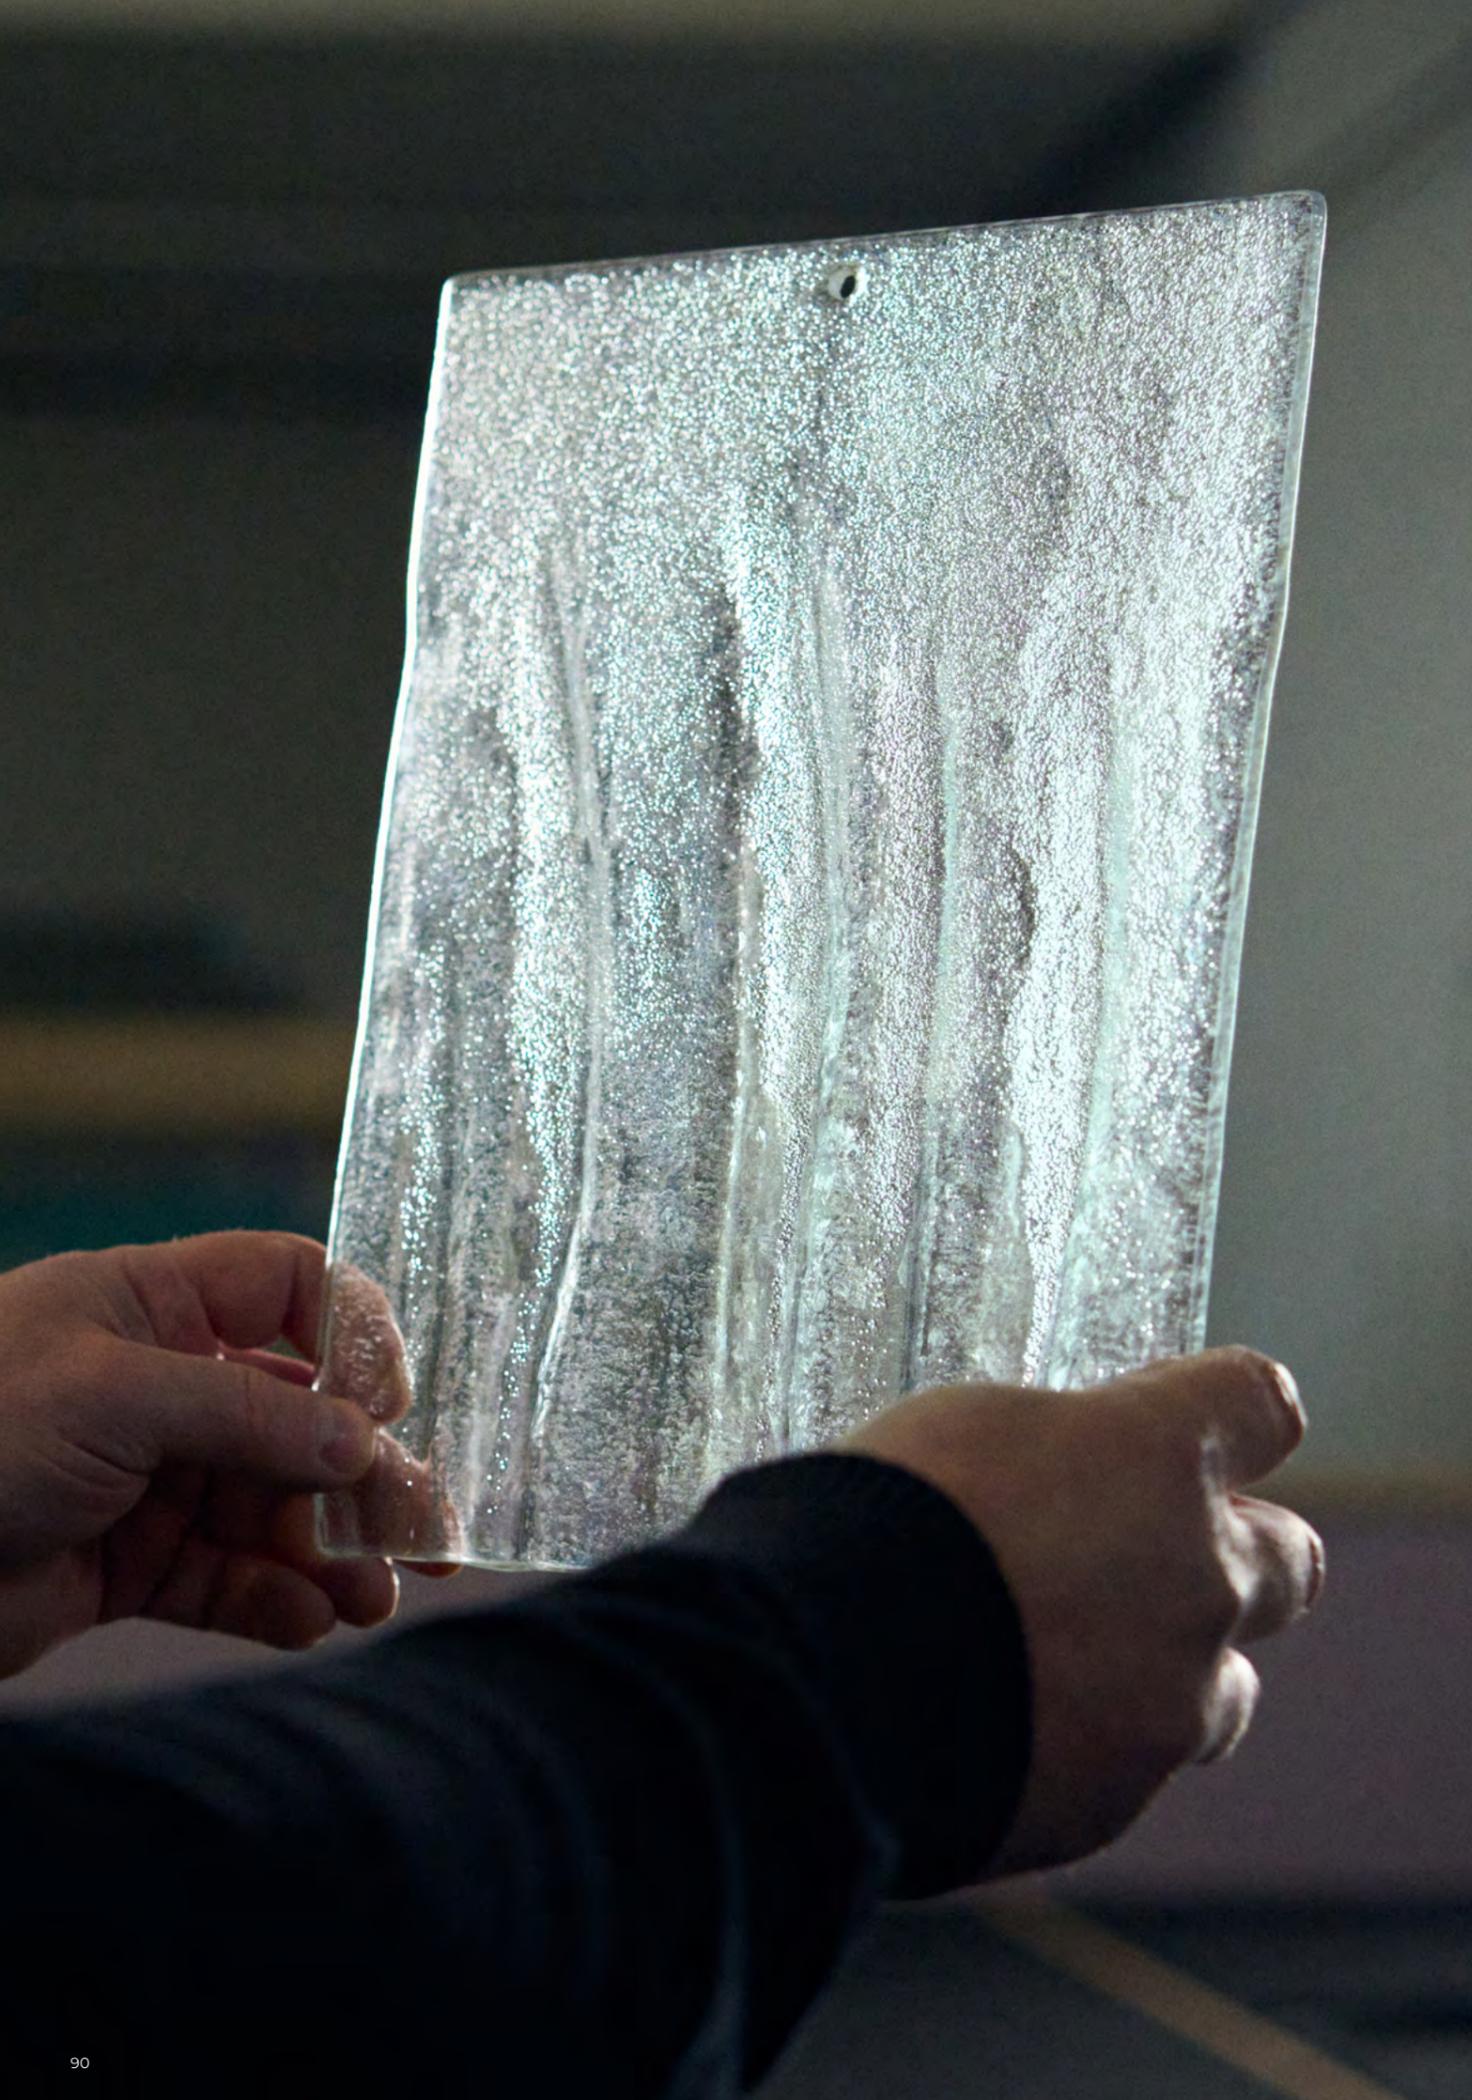

Inspired by the natural drama of waterfalls, the CASCATA collection captures fluid motion in a refined sculptural form. Vertical glass panels, each hand-crafted to mimic the movement of cascading water, are suspended from geometric metal frames, creating a striking

contrast between organic texture and architectural precision. Viewed from above, the triangular or linear frames form graphic silhouettes, while the flowing glass softens the light with a mystical and ethereal quality.

The CASCATA chandelier features a triangular frame that anchors its fluid, rippling glass panels. This sculptural structure creates a dynamic composition from every angle, with clean geometry set against the organic surface of the glass. The opaque-to-clear gradient in each panel gently diffuses the light, resulting in a soft, ambient glow that enhances the chandelier's atmospheric presence. Ideal for double-height spaces or round tables

The defining feature of the CASCATA collection is its hand-crafted glass panels, inspired by the movement and texture of cascading water. Each panel is carefully shaped to create a rippling surface that captures and refracts light in a unique way. The glass features a subtle gradient, transitioning from opaque at the top to clear at the bottom. This gradient softens the LED light from above, producing a diffused, ethereal glow that enhances the sculptural presence of the fixture.

CASCATA Long chandelier adapts the original design into a linear form that is well suited for dining tables or extended spaces. Its slim rectangular frame supports the same artisanal glass panels, which evoke the natural flow and depth of water. The hand-finished gradient, shifting from opaque to clear, allows for gentle light diffusion that creates a soft and immersive effect. Minimalist metalwork brings structure and balance, making CASCATA Long a graceful and impactful centrepiece.

**CASCATA LONG | SATIN BRASS**

#### EXPLORE TORRES

Scan the QR code to explore every light in the TORRES collection.

# TORRES

The TORRES collection includes a floor light, pendant, ceiling lights and wall lights.

Inspired by ancient towers, TORRES reinterprets a timeless architectural form into a series of sculptural lights defined by strength, simplicity and material refinement. The conical shade, a symbol of stability and structure, is paired with minimal detailing to create a bold

silhouette that suits both classic and contemporary interiors. From statement floor and pendant lights to discreet ceiling and wall fixtures, TORRES is designed to cast a strong upward glow that enhances space with precision and elegance.

TORRES FLOOR | POLISHED NICKEL

TORRES stands proud in its elevated form. The sculptural conical shade is reminiscent of ancient towers, where this shape symbolised strength and stability. A simple and refined design that showcases truly exquisite metalwork, handcrafted and assembled in the UK.

TORRES FLOOR | BRONZE WITH HONED ALABASTER

TORRES WALL | BRONZE WITH ALABASTER SHADE

TORRES PENDANT | BRONZE WITH ALABASTER SHADE

#### EXPLORE HEPWORTH

Scan the QR code to explore every light in the HEPWORTH collection.

## HEPWORTH

The HEPWORTH wall light is available in two sizes and four finishes, combining alabaster with pure brass to create a sculptural form inspired by the work of Dame Barbara Hepworth.

HEPWORTH wall light stands as a luminous testament to the artistic prowess of Dame Barbara Hepworth. Drawing inspiration from Dame Barbara's iconic sculptures, renowned for their curvaceous, abstract representations of the human form, this light fitting embodies a similar aesthetic. Its elongated shape, punctuated by a delicate central line, mirrors the soft contours that made Hepworth's work so distinct. Beyond

its artistic appeal, HEPWORTH is versatile enough to illuminate any interior space, and its IP44 rating ensures it's a fitting choice for bathrooms. Crafted from the ethereal combination of alabaster and pure brass, HEPWORTH doesn't just light up a room, it transforms it. When activated, its soft, diffused light bathes spaces in a warm and inviting glow, encapsulating both the artistry of Dame Barbara and the ingenuity of contemporary design.

HEPWORTH WALL | IP44

#### EXPLORE NIMBUS

Scan the QR code to explore every light in the NIMBUS collection.

## NIMBUS

The NIMBUS collection includes chandeliers in original, round and cascade formats, along with a wall light. Available in a range of sizes and finishes.

Inspired by the ephemeral beauty of clouds and light, the NIMBUS collection brings a contemporary elegance to traditional lighting forms. At the heart of each design are fritted glass discs, individually hand-formed by artisans to create unique textures and organic profiles. These sculptural elements

gently diffuse light, producing a warm and enchanting glow that transforms any space. Referencing both retro and modern aesthetics, NIMBUS offers a timeless yet distinctive statement, perfect for dining areas, living rooms, stairwells and corridors.

NIMBUS ROUND LARGE | SATIN BRASS

Each NIMBUS glass disc is individually hand-formed using a specialised fritting process that results in unique crystal-like textures and gentle undulations. The translucent quality of the glass allows light to pass through softly, while the textured surface creates subtle variations and visual interest. Framed in satin brass or bronze, the glass becomes both a light source and an artistic element.

#### EXPLORE SASHA

Scan the QR code to explore every light in the SASHA collection.

## SASHA

Available in a satin brass, antique bronze or bronze finish

A contemporary and elegant design, the SASHA Pendant transfixes those who see it. Each fritted glass disc is highly unique, skilfully handmade and finished by our artisans. Sculptural when off, the organic glass discs softly diffuse the light when on, creating a mesmerising effect.

Each piece of glass is unique. The droplets are hand-formed by our artisans using a process where undulations and crystal-like textures form, contrasting with a luxurious satin brass collar.

SASHA | BRONZE

#### EXPLORE MODULO

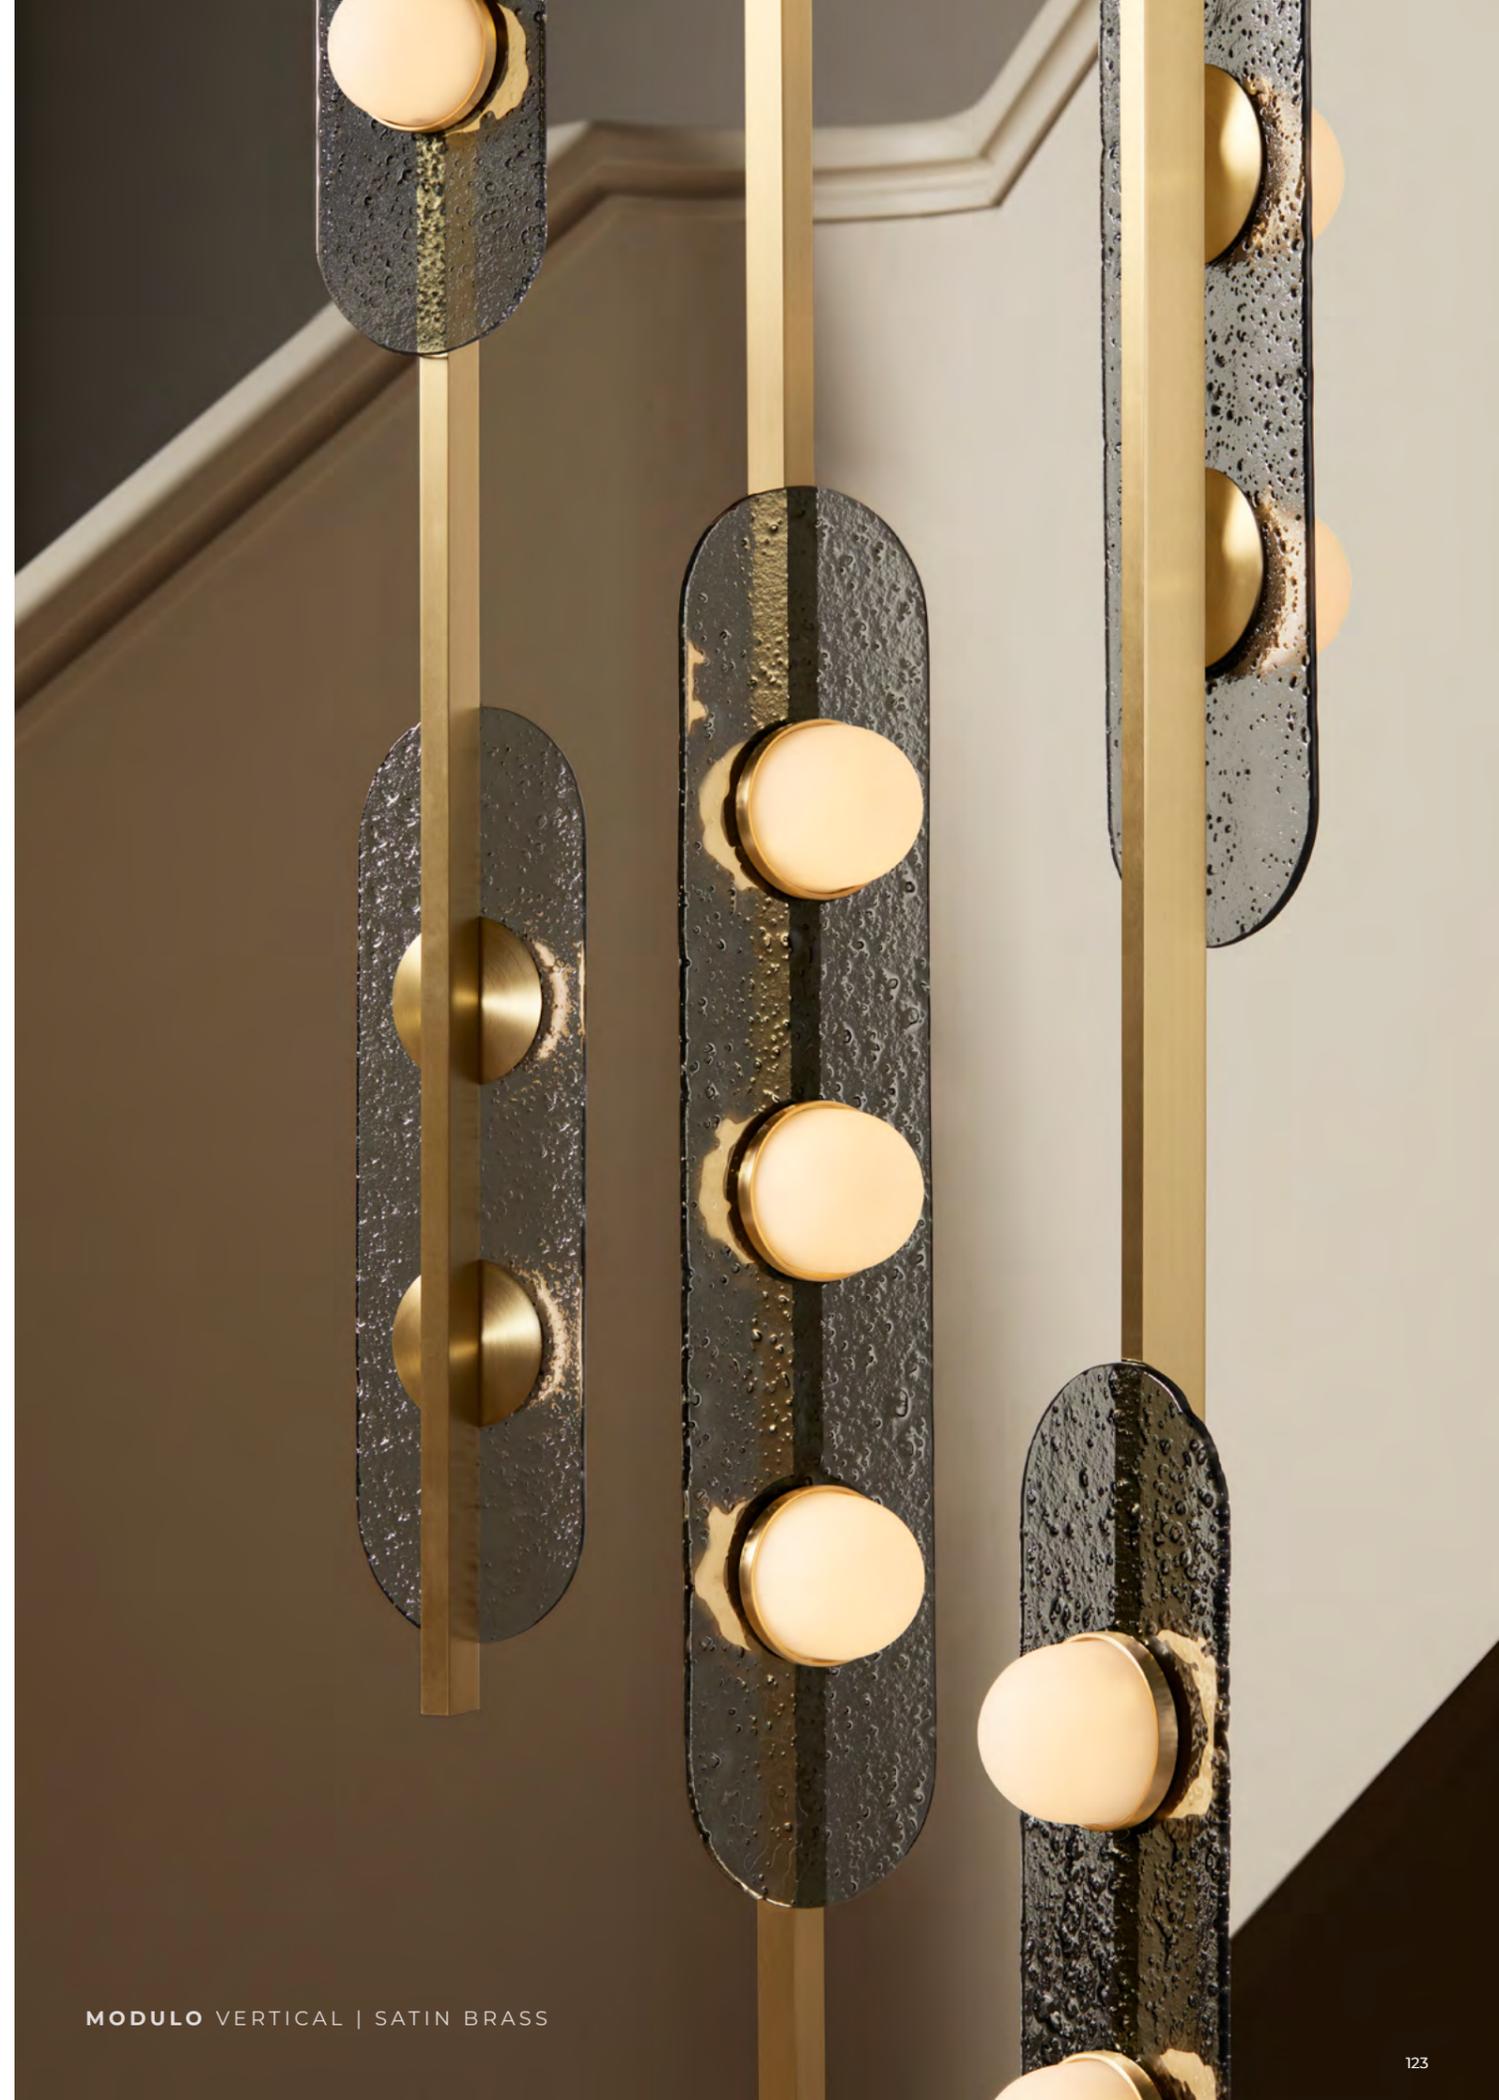

Scan the QR code to explore every light in the MODULO collection.

## MODULO

The MODULO collection includes vertical, horizontal and grid pendants, as well as IP44 rated wall lights.

MODULO is a modular lighting collection that blends sculptural form with functional elegance. Designed by Italian designer Federico Peri, the collection explores repetition and rhythm through geometric arrangements of glass and metal. Each configuration, whether vertical, horizontal, grid or wall-mounted, is defined by

a refined interplay of structure and transparency. The result is a contemporary lighting sculpture that brings sophistication and versatility to a wide range of interior settings. Ideal for both residential and hospitality spaces, MODULO offers a minimalist yet expressive design language that adapts to its surroundings.

MODULO VERTICAL | SATIN BRASS

Each smoked kiln cast glass piece is unique, hand-crafted by artisans, textured and subtly tinted. The jewel like glass module is suspended by hand-finished brass, providing a delicate and decorative framework.

**MODULO** HORIZONTAL | BRONZE

The **MODULO** Horizontal pendant presents a clean, linear arrangement of smoked glass discs and glowing domes, spaced evenly along a brass frame. This configuration is ideal for illuminating dining tables, kitchen islands or long corridors, offering a soft, ambient light with strong visual impact. The horizontal format emphasises rhythm and proportion, while the translucent glass and brass framework maintain a refined and airy feel. Its simplicity makes it versatile, while its detailing makes it unmistakably crafted.

The MODULO Grid pendant showcases a structured, graphic arrangement of hand-textured glass discs and engineered brass. Its modular format forms a balanced square or rectangular composition, making it ideal for larger spaces or areas where a sculptural ceiling light is required. Whether used individually or repeated in multiples, the grid format creates a striking focal point that is both architectural and decorative. This design suits dining rooms, stairwells, or contemporary gallery-style interiors where form and craftsmanship take centre stage.

**MODULO** GRID 11 | SATIN BRASS

#### EXPLORE PENDULUM

Scan the QR code to explore every light in the PENDULUM collection.

## PENDULUM

The PENDULUM collection includes pendant, wall and floor lights, available in satin brass or bronze. Designed in collaboration with Dan Yeffet, the collection explores balance, movement and refined materiality.

PENDULUM; the stunning collection from CTO Lighting in collaboration with Dan Yeffet, the AD100 accredited Parisian design studio. Combining the flair of European design with the expertise of British craftsmanship, PENDULUM

presents a striking collection of contemporary lights. Balance and refinement are the key elements of the PENDULUM collection, inspired by the timepiece, with its mesmerising and hypnotic qualities.

#### EXPLORE ROMA

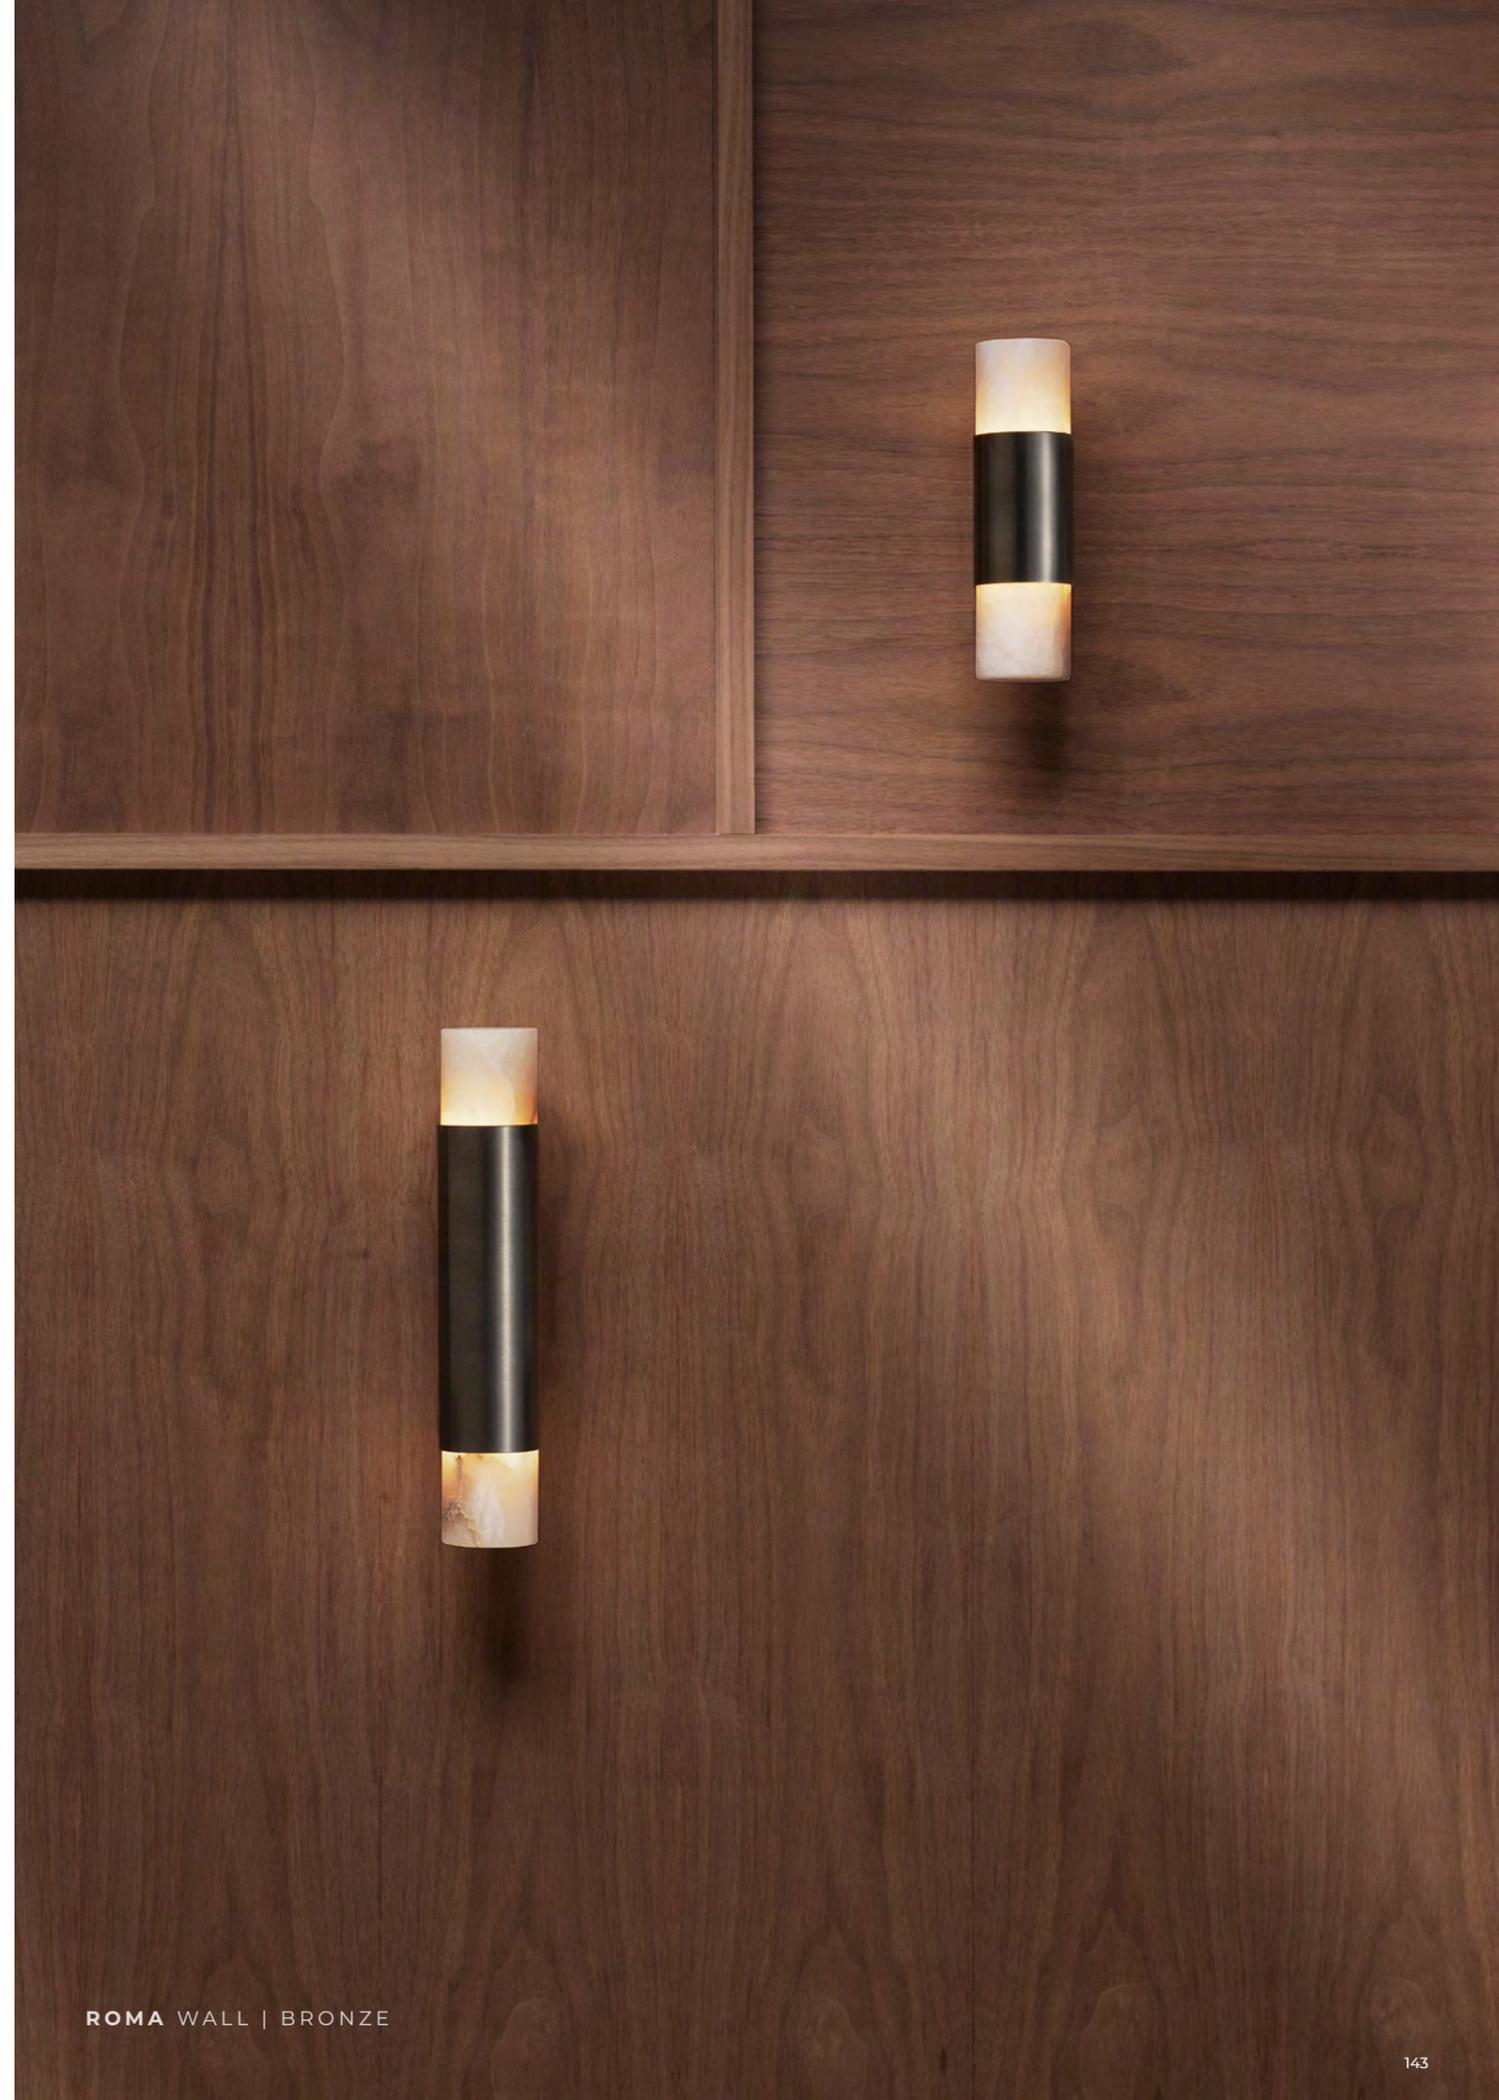

Scan the QR code to explore every light in the ROMA collection.

## ROMA

The ROMA collection includes pendant and wall lights, crafted in honed alabaster with integrated LED. Inspired by ancient Roman architecture, ROMA offers a modern silhouette with timeless materiality.

Inspired by the architectural grandeur of Ancient Rome, the ROMA collection draws on the serene beauty of alabaster windows found in historic forums and churches. These vast stone openings once cast a soft, diffused light across sacred interiors — a quality reimaged in ROMA's modern forms. The collection celebrates simplicity in line and proportion,

using noble materials to create quiet yet impactful lighting. The sleek silhouette and integrated LED technology provide a seamless wash of light both upward and downward, while the alabaster shade diffuses a warm, ambient glow. Whether used as a single pendant or layered with wall lights, ROMA brings a sense of architectural calm and refined elegance to contemporary spaces.

#### EXPLORE GAIA

Scan the QR code to explore every light in the GAIA collection.

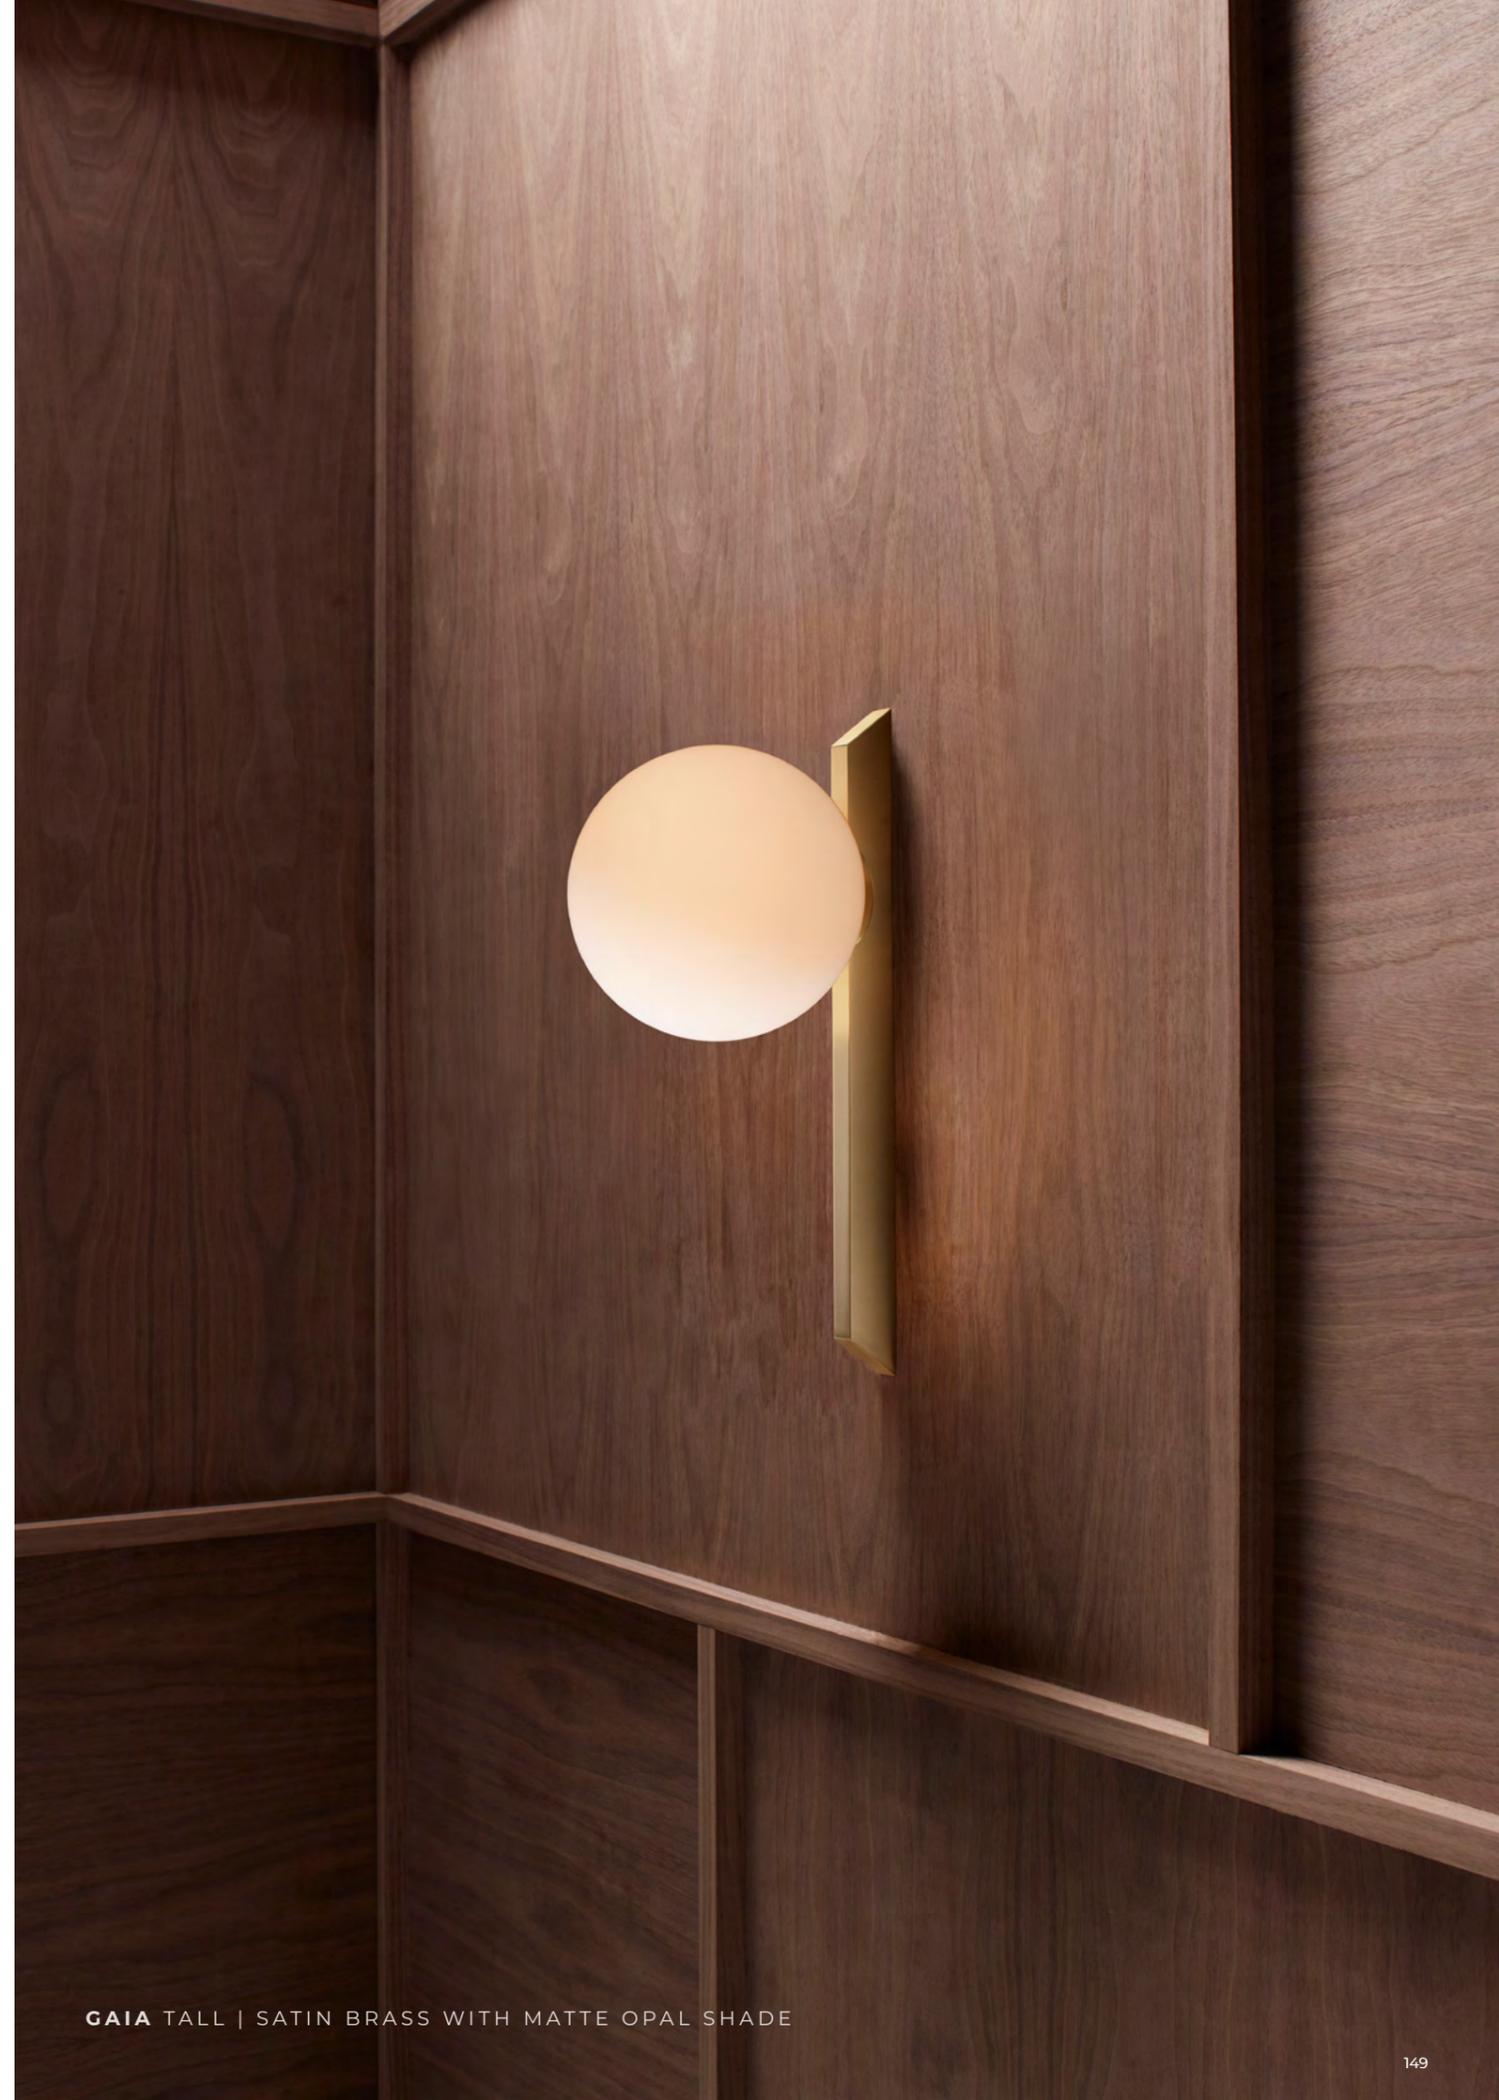

## GAIA

The GAIA wall lights are available in short and tall versions, with a choice of hand-shaped smoked glass, matte or shiny opal, or tinted glass shades.

GAIA wall lights take inspiration from the Art Deco period where refined sleek lines heralded a new period of glamour and modernity.

The GAIA collection of wall lights has been designed with precision engineering, enabling them to project from the wall seamlessly. This carefully considered detail, combined with the handblown

glass shades, gives GAIA its distinct elegance. The compact nature of these wall lights makes them versatile for use in almost any scale of interior, being particularly suited for spaces with a narrow profile. GAIA Wall Lights can be used in multiples for creative placements, and both versions can be mounted facing upwards or downwards.

GAIA TALL | SATIN BRASS WITH MATTE OPAL SHADE

#### EXPLORE IVY

Scan the QR code to explore every light in the IVY collection.

## IVY

The IVY collection is available in three distinct formats: horizontal with 3 or 8 glass shades, vertical with 4 shades, and IVY Round with 15 shades. Each version features bronzed metalwork and a choice of opal or smoked glass.

Inspired by the organic movement of plants growing toward the light, the IVY collection captures a sense of natural flow and sculptural balance. The curved arms extend outward like new growth in spring, creating a soft, branching structure that brings atmosphere and elegance to any space. Each piece is crafted in bronzed metal and paired with opal or smoked glass shades, offering a warm, ambient glow.

Referencing the green spaces of London, IVY brings a subtle sense of nature indoors. With multiple configurations available, including horizontal, vertical and round formats, the collection provides flexibility for both residential and commercial interiors. Whether used as a linear arrangement above a dining table or as a dramatic centrepiece in an entrance hall, IVY transforms spaces with its fluid form and refined materiality.

IVY VERTICAL 4 PENDANT | OPAL GLASS

#### EXPLORE TREVI

Scan the QR code to explore every light in the TREVI collection.

## TREVI

The TREVI collection features pendant lights with sculptural arms in satin brass or bronze, available in single or multi-arm configurations.

Inspired by the historic grandeur of the Piazza di Trevi in Rome, the TREVI collection brings architectural clarity and flowing elegance into a sculptural lighting form. Referencing the iconic fountain where three roads converge at the end of an aqueduct, TREVI's composition is rooted in balance,

rhythm and movement. Each pendant is constructed from solid brass, expertly satined to achieve the signature CTO finish. The arms extend outward with confident precision, supporting acid-etched glass shades that diffuse the light into a soft, ambient glow.

TREVI 3 | SATIN BRASS

TREVI 6 PENDANT | BRONZE

Designed for dramatic impact, TREVI MULTI expands the original pendant into a striking multi-tiered composition. Solid satin brass or bronze arms are arranged in a geometric, grid-like formation, extending light across wider spaces with precision and elegance. Available in two- or three-tiered options, this modular design can be scaled to suit the height and volume of a space, making it ideal for double-height rooms, grand stairwells or statement dining areas.

## RING

The RING collection includes pendant, cluster, wall and table lights. Sculptural in form and available in a range of configurations, each piece is designed to create dramatic light and shadow effects

Inspired by the chiaroscuro technique, where light and shadow are used to create depth and contrast, the RING collection explores this dynamic interplay through refined, architectural forms. Each design features a series of offset rings that appear to float in space, casting dramatic silhouettes when lit and forming an elegant

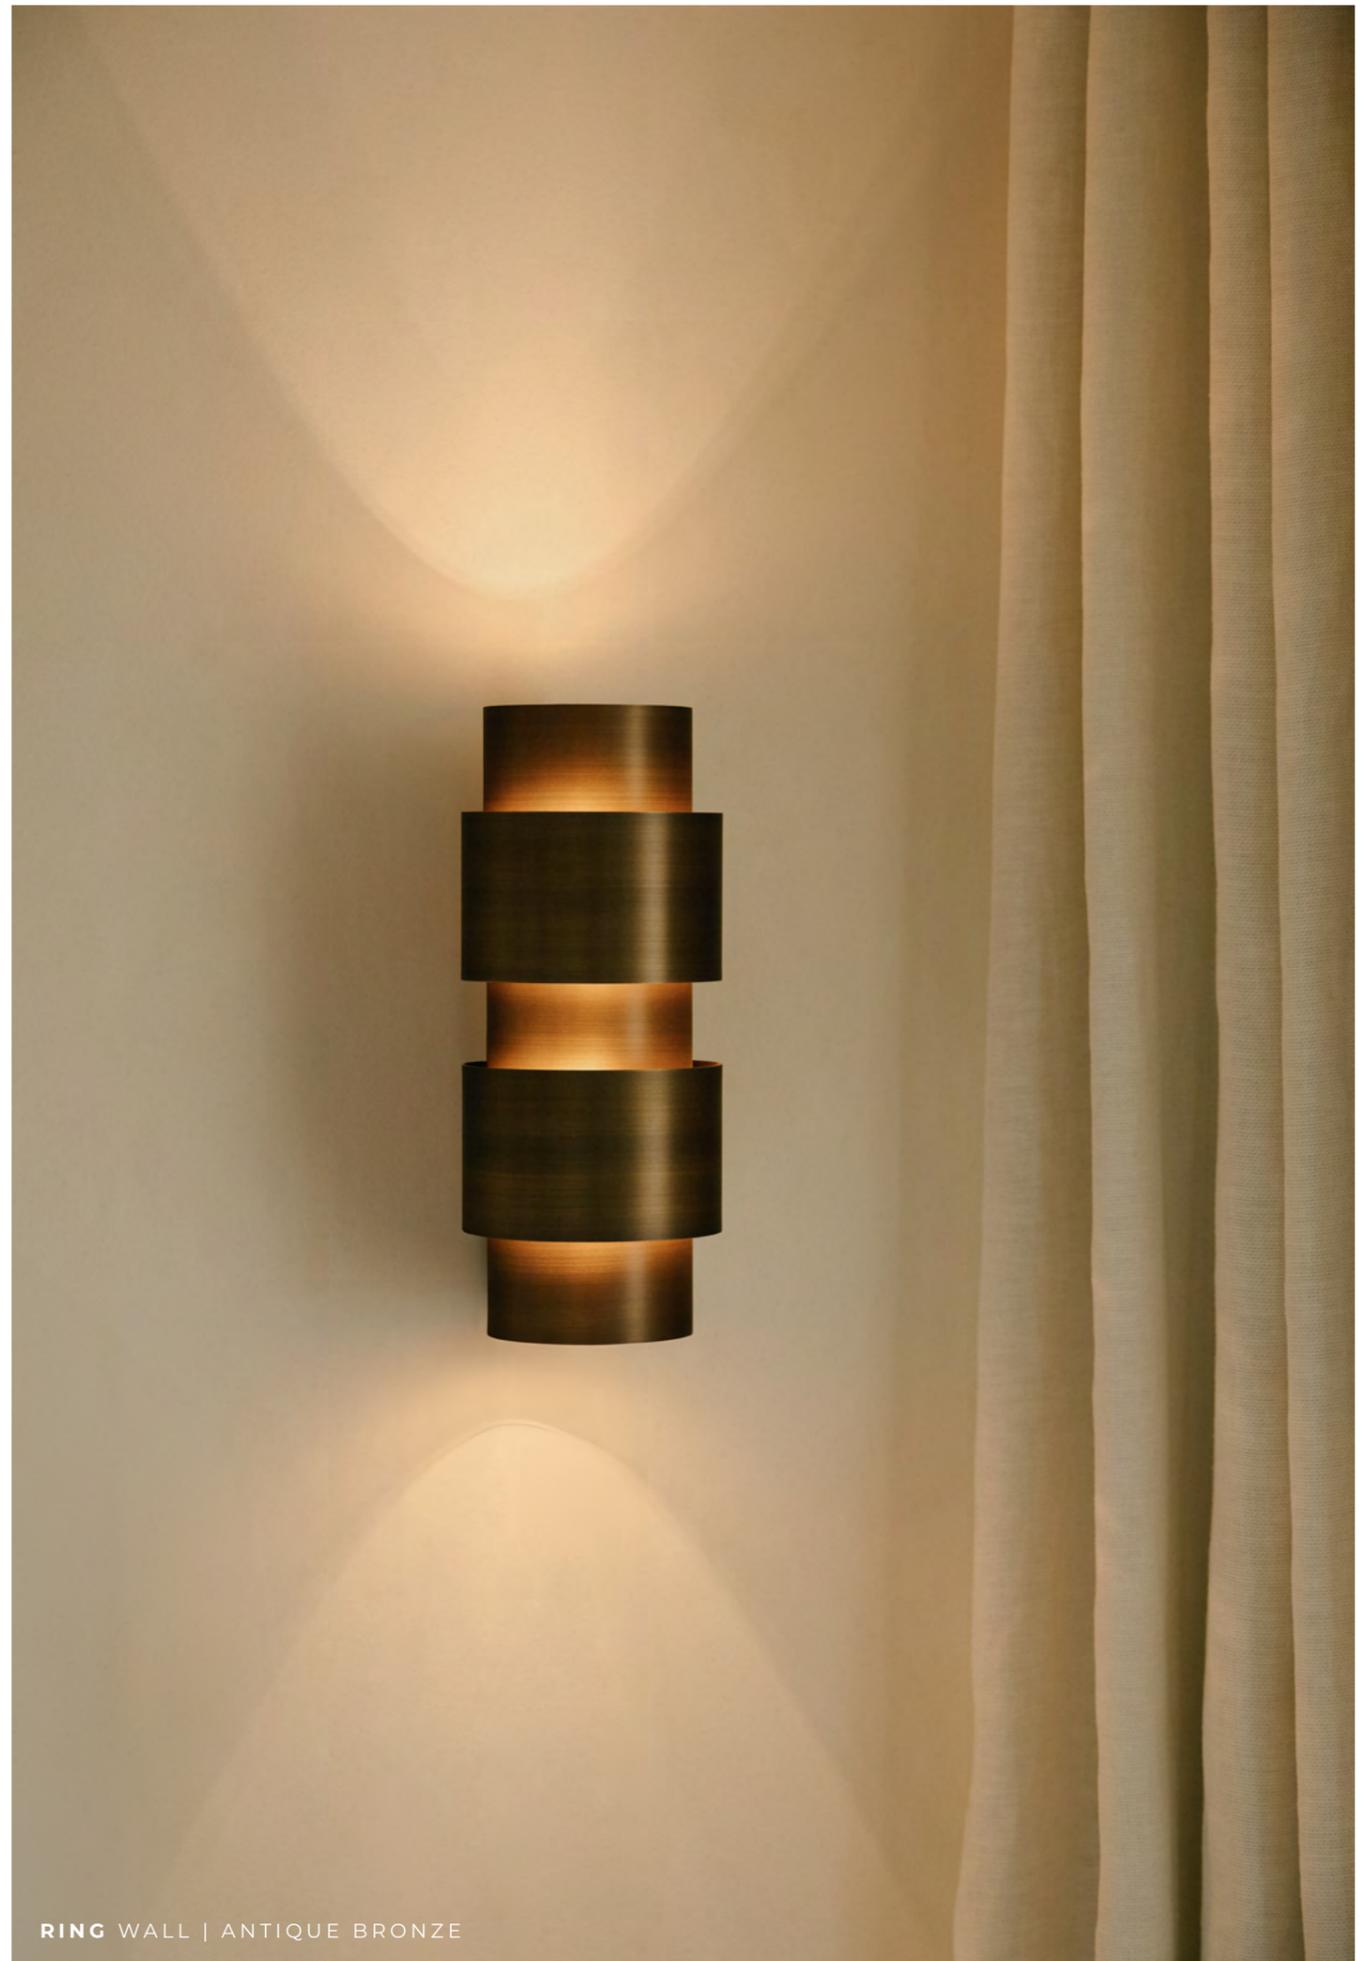

sculptural presence when unlit. Available as pendants, wall lights, clusters and a table lamp, RING offers a versatile lighting solution with graphic impact. Whether used individually or in multiples, the collection brings a sense of rhythm, shadow and spatial awareness to the interior.

RING PENDANT | SATIN BRASS

RING WALL TALL | BRONZE

## LUCID

The LUCID collection includes pendant, ceiling, wall and table lights, crafted from honed alabaster with satin brass, bronze or oxidised silvered brass finishes. Designed by Michael Verheyden

Inspired by Parisian brasseries and the delicate form of snowdomes, the LUCID collection celebrates the interaction of light and material. Designed by Michael Verheyden, the collection pairs domes of honed alabaster with precision-engineered metalwork in finishes including

satin brass and a distinctive oxidised silvered brass, developed in collaboration with a specialist silversmith. LUCID offers a balance of purity and complexity, where minimal form enhances the unique character of each natural material.

LUCID PENDANT

At the heart of the LUCID collection is a dome of honed alabaster, chosen for its natural translucency and intricate veining. When illuminated, light emanates from beneath the surface, revealing the soft patterns and tonal shifts within the stone. No two pieces are the same, making each LUCID light uniquely atmospheric. The alabaster becomes both diffuser and focal point, casting a warm, ethereal glow that brings softness and depth to the surrounding space. This quiet interplay between light and material defines the character of the collection, turning every fitting into a sculptural centrepiece.

**EXPLORE CLOUDESLEY**

Scan the QR code to explore every light in the CLOUDESLEY collection.

# CLOUDESLEY

Available in small, medium and large sizes.

Named after the Georgian street, home of the CTO showroom, CLOUDESLEY reflects an era of style and splendour. CLOUDESLEY collection revisits classical lines,

effortlessly interpreted through bronze or brass metalwork with etched opal glass shades, bringing a cloud like form, to modern and sophisticated interiors of today.

#### EXPLORE CIELO

Scan the QR code to explore every light in the CIELO collection.

## CIELO

Pendant, wall and ceiling mounted lights available in two sizes.

The collection takes its inspiration from the architectural cupola. When combined with our unique artisan glass finish, the semi-transparent shallow dome reflects the light

source in a special way, which is both functional and ethereal. The LED source is hidden from view and is contained within a satin brass or bronze cupped centre.

#### EXPLORE ARRAY

Scan the QR code to explore every light in the ARRAY collection.

# ARRAY

Pendant, wall, table and floor lights available in various combinations.

Inspired by the Italy of the 60's. Familiar yet modern, its distinctive form with rotating arms comes with hand-blown opal shades, or cotton shades, allowing the sculptural

piece to be repositioned. The metalwork is brass, then bronzed and hand waxed which contrasts with the brass detailing.

#### EXPLORE OSCAR

Scan the QR code to explore every light in the OSCAR collection.

## OSCAR

Floor light available in bronze, satin brass or bronze with satin brass base.

Mastering a balanced composition, OSCAR features a delicate opal glass shade suspended by a sleek stem and grounded by an expertly machined solid brass base. Where form meets function, each globe shade is adjustable, allowing you to direct a warm illumination exactly

where it is needed. Available with a satin brass or bronze stem, the OSCAR Floor Light is a highly versatile lamp and will add an understated luxury to any interior space.

#### EXPLORE CARAPACE

Scan the QR code to explore every light in the CARAPACE collection.

## CARAPACE

The CARAPACE collection includes pendant, wall and ceiling lights. The pendant is available with either a drop rod or chain suspension.

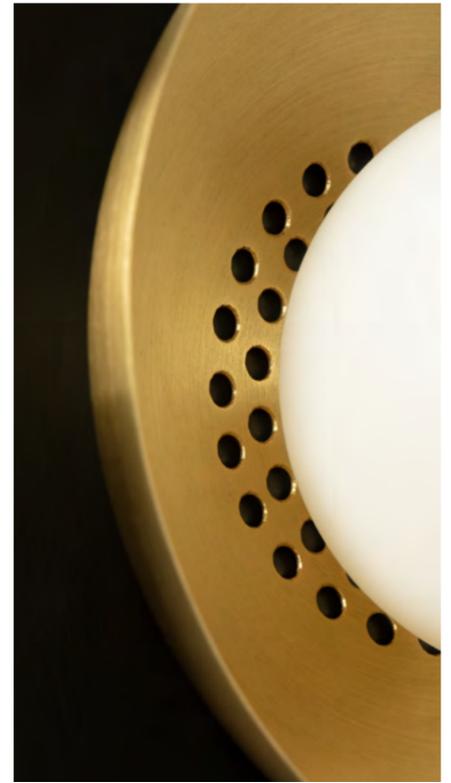

A modern re-interpretation of a 1920's light. Hand-spun metal shades are finished in bronze and brass. Carefully designed holes in

the brass disc allow light to glow within the bronze spinning creating a warm glow. The opal glass shade diffuses the light evenly.

#### EXPLORE FLOREN

Scan the QR code to explore every light in the FLOREN collection.

## FLOREN

The FLOREN collection includes pendant lights in two and four-arm versions. Featuring ribbed glass shades and hand-finished antique brass.

Reimagining the principles of the Arts and Crafts movement, the FLOREN collection brings handcrafted detail and structural elegance to contemporary interiors. With its antique brass frame, ribbed glass shades and distinctive chain suspension, FLOREN strikes a balance between decorative and

understated. The open, linear form makes it ideal for use above dining tables and kitchen islands, either as a standalone feature or in multiples for greater impact. The result is a light fitting that feels both timeless and expressive, with a quietly confident character.

#### EXPLORE PETRA

Scan the QR code to explore every light in the PETRA collection.

## PETRA

The PETRA pendant is available in a combination of molten smoked glass or opal glass cores, encased in thick outer layers of tinted glass.

PETRA pendant light perfectly reflects the delicacy and the strength of our natural world. A soft meteoric core of molten smoked glass or opal glass juxtaposed with a second outer layer of thick curvaceous tinted glass. The combination creates a depth of light

and form. These refined translucent glass pendants can either be used as a singular statement light or in multiples to create a delicate display of lights that echo the rhythmic pattern evocative of pebbles on the beach.

**EXPLORE ACROPOLIS**  
Scan the QR code to explore ACROPOLIS  
table light.

# ACROPOLIS

Alabaster table light.

Our artisan partners create the linear effect of ACROPOLIS by skilfully chiselling directly into the alabaster stone surface. A contemporary and balanced design, the solid stone shade glows in a mystical way, producing a luxury, standout piece. The unique veining of the alabaster

means that no two lights are the same. Some are almost white whilst others have grey veining. Texture is added by our artisans by chiselling out the stone surface. The alabaster shade glows in a unique way to evoke a luxurious standout piece.

#### EXPLORE COLUMBO

Scan the QR code to explore COLUMBO table light.

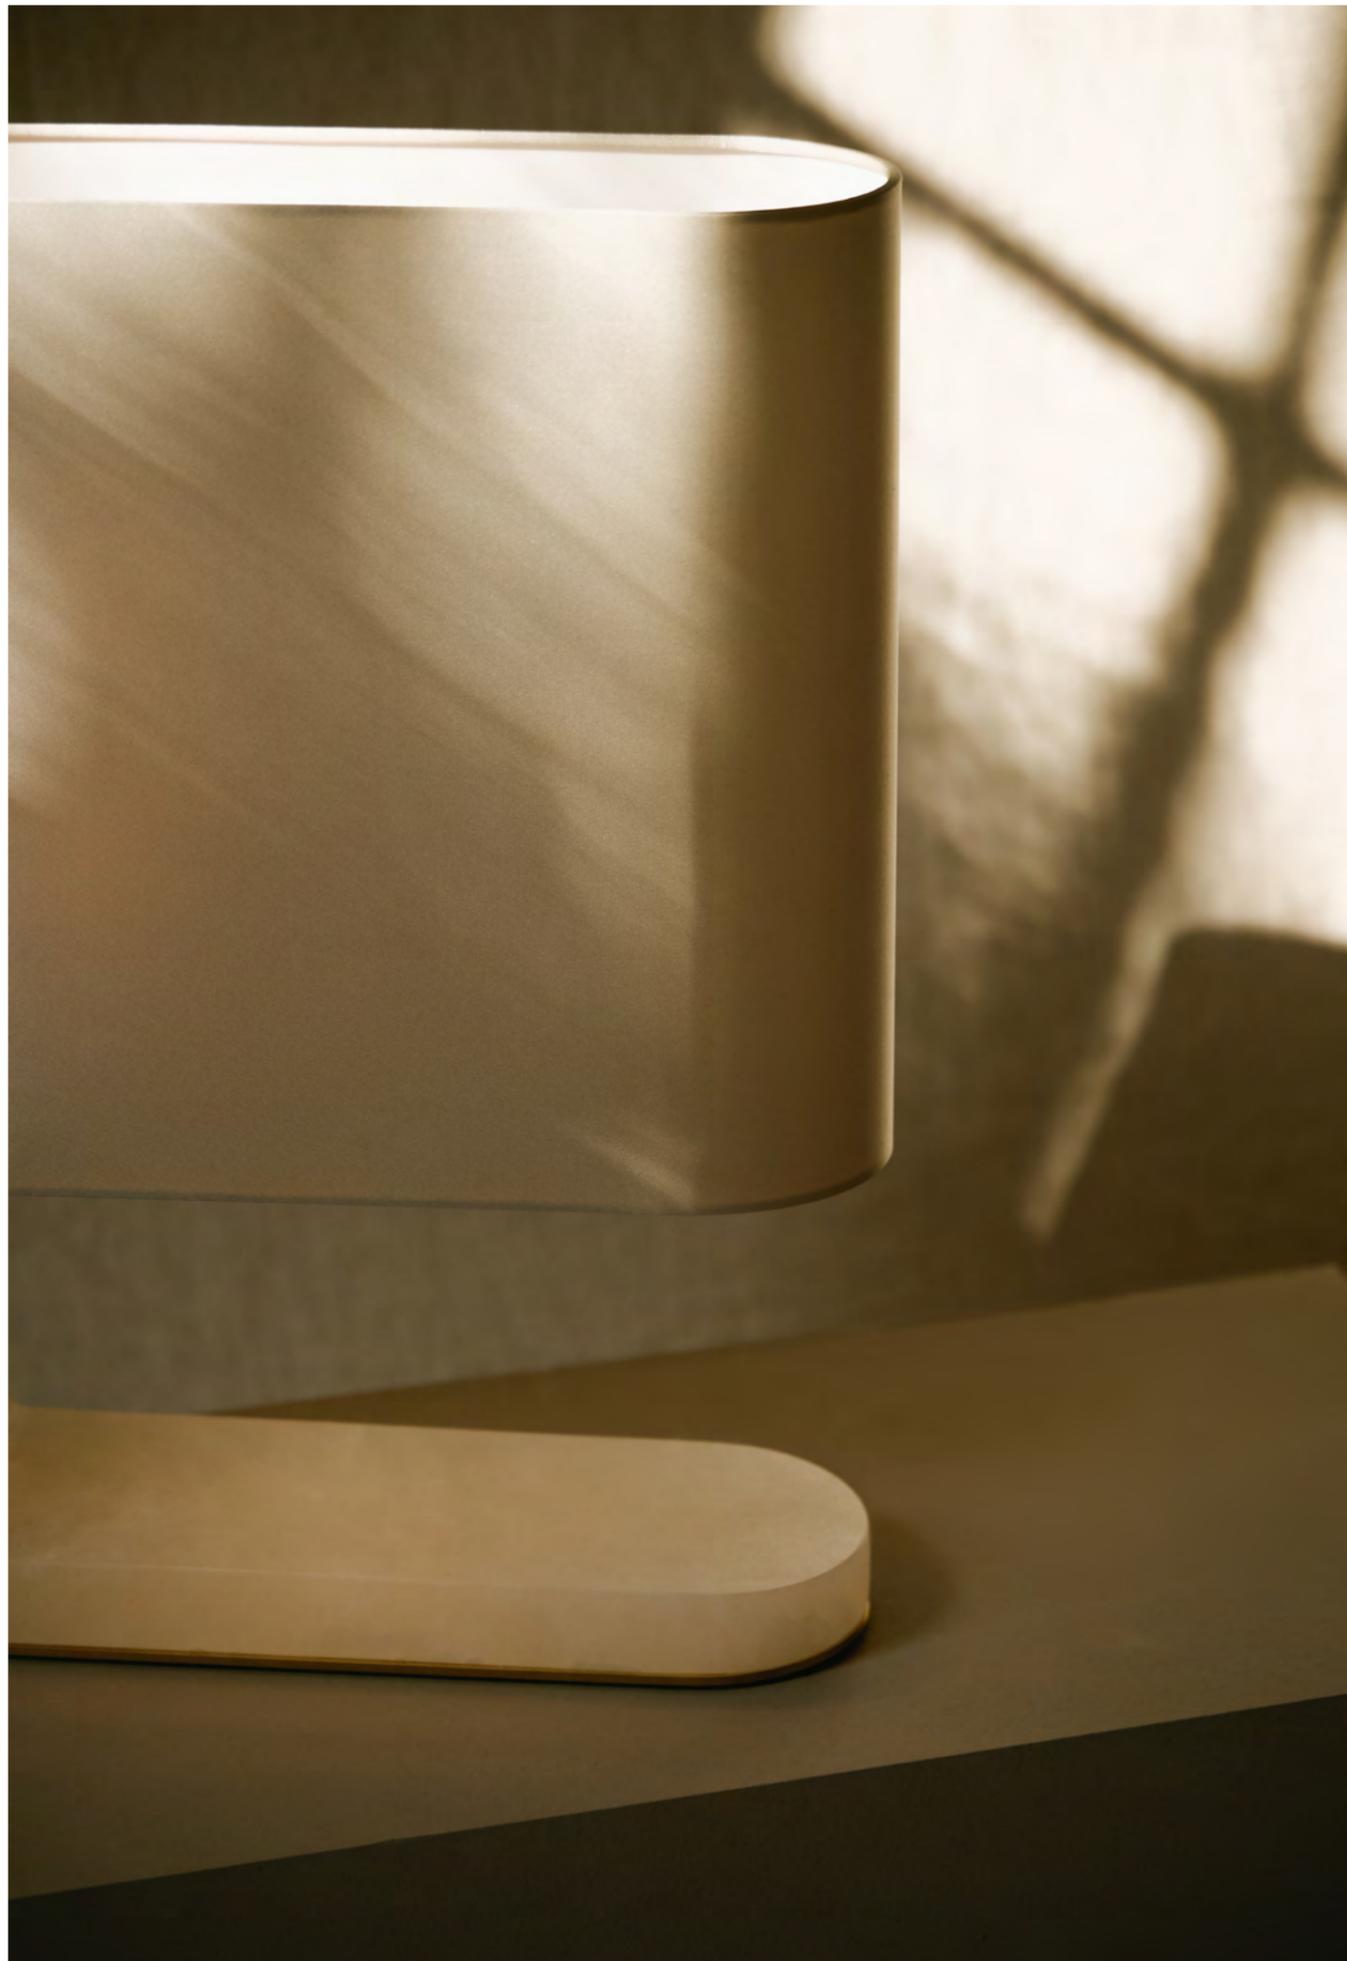

# COLUMBO

Alabaster table light.

A truly unique light. Luxurious veined alabaster is hand cut and polished and is a thing of natural beauty and texture. Its curved form and translucent nature allows light

to filter through adding a lightness that belies its obvious weight. Detailed with a brass plinth, a compact design for tables, consoles and desks.

## EXPLORE BRAQUE

Scan the QR code to explore BRAQUE table light.

# BRAQUE

Table light in brass with handmade oval shade

Our craftsmen hand-cast a base in brass with its natural undulations. It is then bronzed and waxed to give either an antique finish or solid

bronze patina. The oval handmade shades have a matching top diffuser to prevent any glare when viewed from above.

**EXPLORE WHISTLER**

Scan the QR code to explore WHISTLER wall light.

# WHISTLER

IP44 rated bathroom wall light.

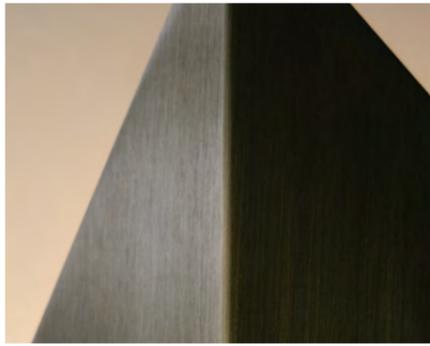

A truly unique light. Luxurious veined alabaster is hand cut and polished and is a thing of natural beauty and texture. Its curved form and translucent nature allows light

to filter through adding a lightness that belies its obvious weight. Detailed with a brass plinth, a compact design for tables, consoles and desks.

## FRITTED GLASS

This technique allows for the natural formation of undulations and crystal-like textures, making each glass disc uniquely sculptural. When illuminated, these discs transform into mesmerising light sources, diffusing a soft, captivating glow that enhances any environment.

### EXPLORE FRITTED GLASS

Scan the QR code to explore all of our fritted glass lights.

## BRONZE

Known for its rich, deep hues and robust quality, bronze brings a touch of historical grandeur to modern settings, enhancing any space with its warm, inviting glow.

### EXPLORE BRONZE

Scan the QR code to explore all of our bronze lights.

## VEILED GLASS

Veiled glass is created through a process that combines the ancient Pulegoso technique with liquid opal. Molten glass, poured at over 800°C, is hand-shaped in a steel mould with softened edges, then slowly annealed for 24 hours to achieve its semi-translucent, mist-like texture. The result is glass that diffuses light with an atmospheric softness, echoing the natural landscapes that inspired its design.

### EXPLORE VEILED GLASS

Scan the QR code to explore all of our veiled glass lights.

## SATIN BRASS

Satin brass, celebrated for its warm golden tones and brushed satin finish, brings a luxurious yet understated elegance to any setting. This material, selected for its durability and beauty, undergoes a precise process to achieve its distinctive soft sheen.

### EXPLORE SATIN BRASS

Scan the QR code to explore all of our satin brass lights.

## WAVY KILN GLASS

Each panel of glass in this exquisite collection is a unique piece of art, hand-crafted by skilled artisans. The glass is cast on custom-made moulds, creating natural undulations that mimic the rhythmic motion of water. The rectangular panels are meticulously positioned to capture a wave-like profile, complete with a watery texture that plays with light and shadow. During the crafting process, a wash of crushed glass is added, enhancing each piece with a beautiful, graduated appearance.

### EXPLORE WAVY KILN GLASS

## POLISHED NICKEL

Illuminate your space with the sleek, mirror-like finish of our Polished Nickel Lights. This exquisite material merges the best of modern aesthetics with unparalleled functionality, offering a versatile and stylish lighting solution for any interior. Polished nickel stands out for its brilliant, silvery finish that adds a vibrant, contemporary touch while reflecting the surrounding light and colour.

### EXPLORE POLISHED NICKEL

Scan the QR code to explore all of our polished nickel lights.

## SMOKED KILN GLASS

Each smoked glass plate is a unique creation, meticulously handcrafted and textured by our skilled artisans. This material highlights the deep, smoky hues of the glass, which captivate and intrigue with their subtle interplay of light and shadow. The textured surface of the glass enhances this effect, creating a mesmerizing reflection and diffusion of light that adds depth and drama to any space.
